PART I

Introduction

INTRODUCTION · CHAPTER 1

1. About This Manual

This manual explains how to use the Barangay Maduya Portal, the official website and online services portal of Barangay Maduya, City of Carmona, Cavite. It covers the public website, which anyone can visit, and the portal, which residents and barangay staff sign in to.

1.1 Who this manual is for

- **Residents of Barangay Maduya** who want to request barangay documents, report community concerns, reserve the barangay court, list a local business, follow news and announcements, and view the barangay's projects.
- **Barangay administrators** (Admins and Super Admins) who review residents' submissions, publish news and transparency projects, manage user accounts and keep the barangay's settings up to date.
- **The portal's AI Assistant**, which uses this manual as one of its reference documents when it answers questions about how the Barangay Maduya Portal works.

1.2 How this manual is organized

- **Part I, Introduction:** what the Barangay Maduya Portal is, user roles, accounts and how to get around the portal.
- **Part II, Resident Guide:** every service residents use, step by step: Resident Credentials, Document Requests, Complaints, Court Reservation, Community Hub, News and Announcements, Transparency, Notifications, About Us and the AI Assistant.
- **Part III, Administrator Guide:** how barangay admins review submissions and manage news, projects, users, Barangay Settings, the Audit Logs and the AI Assistant's knowledge base.
- **Part IV, Reference:** status meanings, reference numbers, upload limits, option lists, frequently asked questions and a glossary.

1.3 Information this manual does not list

Some details change whenever the barangay updates them, so this manual does not list their values. They are always shown in the portal itself, and the barangay's admins keep them current in Barangay Settings:

- The barangay's hotline numbers, email address and office address.
- The GCash number used for payments.
- The fee for each paid Barangay Clearance purpose.
- The court reservation day rate and night rate.

- The barangay's goal, mission and vision.
- The current Barangay Officials and Sangguniang Kabataan (SK) officials.

The AI Assistant always knows the current values of all of these. If a value ever seems different between this manual and the portal, the portal is correct.

1.4 Terms used in this manual

- **Public website:** the pages anyone can open without signing in: Home, News, Transparency and About Us, plus the Privacy Policy and Terms of Service.
- **Portal:** the signed-in part of the website, where residents and admins use the barangay's services.
- **Submission:** anything a user sends to the barangay for review: a document request, a complaint, a court reservation or a Community Hub business.
- **Submission Info:** the window that shows every detail of one submission, including its status and the barangay's reply.
- **Reference number:** the code that identifies a submission, such as DR-12 for a document request or CP-3 for a complaint.
- **Resident Credentials:** the resident profile (personal details and a valid ID) that residents complete before they can use most barangay services.

INTRODUCTION · CHAPTER 2

2. The Barangay Maduya Portal at a Glance

2.1 What the portal does

The Barangay Maduya Portal is the barangay's one-stop digital portal for barangay services. With it, residents can:

- Request barangay documents online: Barangay Clearance, Certificate of Residency, Certificate of No Objection, Certificate of Indigency, Solo Parent Certification and Medical / Lab Assistance.
- Report non-emergency community concerns (complaints) and follow each report's progress. The Complaint page is not a blotter: to file a blotter, residents must go to the barangay in person.
- Reserve the barangay court and see which times are already booked.
- Discover local businesses in the Community Hub directory and list their own business.
- Read news and announcements, including events and emergency announcements.
- View the barangay's transparency projects with their budgets and locations.
- Get notified in the portal when the barangay updates the status of their submissions.
- Ask the AI Assistant questions about barangay services by typing or speaking.

Barangay admins use the same portal to review and act on residents' submissions, publish news and transparency projects, manage user accounts, and update the barangay's fees, contact details and list of officials. Every change admins make is recorded in the Audit Logs, so Super Admins can see who did what and when.

2.2 The technology behind the portal

The Barangay Maduya Portal is built on three foundations:

- **Artificial Intelligence:** every complaint is sorted by category and urgency (priority) as soon as it is filed, and barangay admins can generate budget, manpower and timeframe estimates for the response.
- **AI Assistant:** residents and admins can ask about barangay services by typing or speaking. The assistant answers questions and points users to the right page or form.
- **Cloud-based infrastructure:** requests, reports, bookings and uploaded files are saved online, so users can sign in from any device to check their status and see notifications when it changes.

2.3 User roles

Every Barangay Maduya Portal account has one of three roles. Your role is shown under your name at the bottom of the portal's sidebar and on your profile page.

- **Resident:** the role of every new account. Residents use the barangay's services and can see only their own submissions.
- **Admin:** barangay staff. Admins review all residents' submissions, publish news and transparency projects, manage the list of officials and Barangay Settings, manage the AI Assistant's knowledge base documents, and can ban or unban resident accounts. They can see their own changes in the Audit Logs tab of their profile.
- **Super Admin:** an admin who can also change other users' roles, ban or unban admins, delete user accounts, erase a deleted user's data, edit or delete news posts and transparency projects written by other admins, and view the Audit Logs of every admin's changes.

A new account always starts as a Resident. Only a Super Admin can make someone an Admin or a Super Admin, from the User Management page or the user's profile page. Admins don't have Resident Credentials, so making a resident an Admin or Super Admin deletes their Resident Credentials, including their valid ID photos.

2.4 What each role can do

Feature	Resident	Admin	Super Admin
Request documents and file complaints	Yes	No	No
Reserve the court	Yes, needs approval	Yes, approved automatically	Yes, approved automatically
Submit a Community Hub business	Yes, needs verification	Yes, verified automatically	Yes, verified automatically
See submissions	Own only	All residents'	All residents'
Notifications page	Yes	No	No
Post news and transparency projects	No	Yes	Yes
Edit or delete other admins' posts	No	No	Yes
Barangay Settings	No	Yes	Yes
User Management	No	View users, ban residents	Full control
AI Assistant Knowledge Base (in Barangay Settings)	No	Yes	Yes
Audit Logs	No	Own changes, on their profile	Every admin's changes

Admin accounts don't request documents or file complaints, because residents submit those from their own accounts and admins handle them. Admins can still reserve the court and submit a business without Resident Credentials. Their court reservations are approved automatically without a GCash payment, and their businesses are verified automatically.

INTRODUCTION · CHAPTER 3

3. Accounts and Signing In

3.1 The public website and the portal

Anyone can open the Barangay Maduya public website without an account. The public website has four main pages: Home, News & Announcements, Transparency and About Us. The top menu shows Home, News and About Us, with **Log in** and **Register** buttons. Transparency is linked from the Home page's services section and footer. The Privacy Policy and Terms of Service are public pages too (see Privacy Policy and Terms of Service below).

Every other service, such as document requests, complaints, court reservations and the Community Hub, is in the portal and needs an account. If you open a portal link while signed out, you're asked to log in first, then taken to the page you wanted.

When you're already signed in, the public pages take you to their portal versions automatically. For example, opening the public News page or a shared news post link while signed in shows the same page inside the portal.

3.2 Creating an account (registering)

To register for a Barangay Maduya Portal account:

1. Open the barangay website's Home page.
2. Click **Register** in the top menu. On a phone, tap the menu button first. You can also click **Register as a resident** in the Home page's services section, or **Log in / Register** in the footer.
3. Follow the steps in the sign-up window.
4. After you sign up, the portal's Home page opens.
5. Complete your Resident Credentials (see the Resident Credentials chapter) so you can use the barangay's services.

Every new account starts with the Resident role.

3.3 Logging in

To log in to the Barangay Maduya Portal:

1. Click **Log in** in the public website's top menu, or **Log in to access services** on the Home page.
2. Enter your sign-in details in the window that opens.
3. The portal's Home page opens, or the portal page you were trying to open.

3.4 The account menu and signing out

At the bottom of the portal's sidebar are your profile picture, your full name and your role (Resident, Admin or Super Admin). Click your profile picture to open the account menu:

- **Manage account:** change your account details, such as your profile picture and sign-in details.
- **My Profile:** open your profile page in the portal. A resident's profile has their Resident Credentials and all their submissions. An admin's profile has their businesses, court reservations, news posts, transparency projects and their own Audit Logs.
- **Sign out:** sign out of the portal.

Your name in the portal comes from your account. Saving your Resident Credentials also updates the first and last name on your account.

3.5 Banned and deleted accounts

A barangay admin can ban an account. A banned user can't sign in to the Barangay Maduya Portal until an admin unbans them. If you can't sign in and think your account was banned, contact the barangay using the hotlines or email shown at the top of the public website.

A Super Admin can delete an account. A deleted account can no longer sign in. The records the user submitted stay in the barangay's records unless a Super Admin also erases that user's data.

3.6 Privacy Policy and Terms of Service

The Barangay Maduya Portal's **Privacy Policy** and **Terms of Service** are public pages that anyone can read, signed in or not. Open them from the **Privacy and Terms** section of the public Home page, from the **Privacy Policy** and **Terms of Service** links at the bottom of the Home page, or from the links in the sign-in and sign-up windows. The Privacy and Terms section also has a **Read the law** link to the Data Privacy Act of 2012 on the National Privacy Commission's website, which opens in a new tab. Each page shows the date it was last updated. By creating an account or using the portal, you agree to the Terms of Service and the Privacy Policy.

The Privacy Policy explains, in line with the Data Privacy Act of 2012 (Republic Act No. 10173):

- **What the portal collects:** your account details, your Resident Credentials and valid ID, the details and files of your submissions, your comments and reactions, your messages to the AI Assistant (and your location, only if you choose to share it), and your light or dark mode choice.
- **Who can see it:** only you and barangay staff can see your Resident Credentials, valid ID, document requests, court reservations and payment receipts. Other users see your name and profile photo on your comments and reactions, and your business's details once it's verified, but never its permit.
- **How long it's kept:** your submissions stay in the barangay's records even after they're completed. Read notifications are deleted automatically 30 days after you read them. The Audit Logs of barangay staff's actions are kept for accountability. Deleting your account doesn't delete your Resident Credentials or submissions automatically; you can ask the barangay to delete them.
- **Your rights:** to be informed, to access, correct or get a copy of your personal information, to object to its processing or ask for it to be blocked or deleted, to claim damages, and to file a complaint with the National Privacy Commission. The portal doesn't sell your information or use it for advertising.

The Terms of Service cover who can use the portal (residents of Barangay Maduya and people with business with the barangay; users under 18 need a parent's or guardian's permission), keeping your account details accurate and private, using only your own valid ID, filing truthful complaints, paying only to the barangay's GCash account, and the rules for comments: nothing false, abusive, obscene, spam or containing someone else's personal information. The barangay may remove content that breaks these rules and suspend accounts that keep breaking them. The Terms also state that the AI Assistant's answers are not official decisions of the barangay, and that every service is still available in person at the Barangay Hall.

To ask about your personal information or the Terms, contact the barangay using the contact details shown on those pages.

4. Getting Around the Portal

4.1 The sidebar menu

After you sign in, the Barangay Maduya Portal shows a sidebar menu on the left. On a phone, the sidebar is hidden: tap the menu button at the top right of the screen to open it. On a computer, the button at the top of the page collapses the sidebar to icons and expands it again.

The residents' sidebar has: Home, Notifications, News & Announcements, Document Request, Community Hub, Court Reservation, Complaint, Transparency and About Us.

The admins' sidebar has: Home, News & Announcements, Document Request, Community Hub, Court Reservation, Complaint, Transparency, About Us, User Management and Barangay Settings. Super Admins' sidebar also has Audit Logs.

For residents, a number beside Notifications shows how many unread notifications they have, or 99+ for more than 99. It refreshes about once a minute. The bottom of the sidebar has the account menu and the dark mode button.

4.2 Dark mode

The dark mode button at the bottom of the portal's sidebar switches the portal between light and dark mode. Your choice is saved to your account, so it follows you when you sign in on another device. The public website always uses light mode.

4.3 Your profile page

Open your profile page from the account menu by choosing **My Profile**. The top of every profile page shows the user's photo, name, email and role. What's below depends on the role:

- **A resident's profile:** the Resident Credentials form, then four tabs that list all their submissions: **Document Request**, **Community Hub**, **Court Reservation** and **Complaint**.
- **An admin's profile:** admins don't have Resident Credentials, so there's no Resident Credentials form. The tabs are **Community Hub** and **Court Reservation** (the businesses and court reservations they submitted), **News** and **Transparency** (the news posts and transparency projects they published) and **Audit Logs** (the changes they made in the portal; see the Audit Logs chapter).

Each row in a tab has the same actions menu as on that service's own page.

Residents can open only their own profile page. Admins can open any user's profile page, including the profile of a deleted user, which shows "Deleted User" with the records that user left behind. When an admin opens another user's profile:

- A resident's Resident Credentials are shown read-only, or a "Resident Credentials Not Completed" notice if the resident hasn't completed them.
- A **Banned** badge appears beside the role of a banned account.

- An actions menu beside the user's name has the same actions as User Management: changing the role, banning or unbanning, and deleting the account, depending on what the admin is allowed to do.
- Another admin's Audit Logs tab is shown only to Super Admins.

Admins can open a user's profile from User Management (click the user's row), from the **View Profile** button in a submission's Submission Info, or by clicking the author's picture on a news post, a transparency project or a comment. Residents can click their own picture on their comments to open their own profile.

4.4 Reference numbers

Every submission in the Barangay Maduya Portal has a reference number made of a prefix and a number:

- **DR:** document request, for example DR-12.
- **CP:** complaint, for example CP-3.
- **CR:** court reservation, for example CR-7.
- **CH:** Community Hub business, for example CH-5.

Reference numbers appear in the **Reference No.** column of every list and at the top of Submission Info. Use your reference number when you contact the barangay about a submission or ask the AI Assistant about it.

4.5 Submission Info and the actions menu

Every submission row has an actions menu, the three-dots button at the end of the row. The menu always has **Submission Info**, plus other actions such as deleting the submission. On the Document Request, Complaint and Court Reservation pages, you can also click anywhere else on a row to open its Submission Info.

Submission Info shows every detail of the submission: its reference number, its status, who in the barangay is handling it, the details you entered, your uploaded files, and the barangay's reply (a pickup message, a rejection reason, a resolution message or a dismissal reason) with any files the barangay attached. A second tab shows the submitter's Resident Credentials, with a **View Profile** button at the bottom that opens the submitter's profile page. That tab isn't shown for a complaint you follow.

For Super Admins, the actions menu of every document request, complaint, court reservation and Community Hub business also has **Audit Logs**, which lists the changes admins made to that submission (see the Audit Logs chapter).

A notification or a button from the AI Assistant can open a submission's Submission Info directly.

4.6 Lists, photos and attachments

Long lists in the portal, such as news posts, projects and submissions, load more items automatically as you scroll down. Click a photo or video to view it larger. Click a document attachment to open or download it.

4.7 Maps and directions

Several pages in the Barangay Maduya Portal have maps: the Map tab on the Complaint, Community Hub and Transparency pages, and the location maps inside a complaint's, business's or project's details.

- Click a pin to see a summary of that place, then **View Details** for its full details.
- **Directions** draws a driving route from your current location to that place. Your browser asks for permission to use your location. The route card has a button to refresh the route from where you are now and a button to clear it.
- **Show My Location** marks where you are on the map.
- The maps shade the area outside Barangay Maduya and outline the barangay's boundary.

4.8 Uploading files

Forms with uploads have a box where you can drag and drop files, or click to select them. Each upload box says which kinds of files it accepts and the size limit.

- **Images:** up to 15 MB each.
- **Videos:** up to 100 MB each.
- **Documents:** up to 15 MB each. Accepted document types are PDF, Word (DOC, DOCX), Excel (XLS, XLSX), PowerPoint (PPT, PPTX) and text (TXT).

Each upload field also has a maximum number of files. Remove a file with its X button before submitting. The Uploads and Limits chapter in Part IV lists every upload field and its limits.

PART II

Resident Guide

RESIDENT GUIDE · CHAPTER 5

5. Resident Credentials (Your Resident Profile)

5.1 Why Resident Credentials are required

Resident Credentials are your resident profile in the Barangay Maduya Portal: your personal details and a photo of a valid ID. The barangay uses them to verify your identity when you request documents and use other services. Until you complete your Resident Credentials, you can't:

- Request any document on the Document Request page.
- File a complaint on the Complaint page.
- Reserve the court on the Court Reservation page.
- Add a business to the Community Hub.

Instead, these pages show a "Complete your Resident Credentials" message with a button that opens the form. You can still read news, view transparency projects, browse the Community Hub directory, view About Us and use the AI Assistant without Resident Credentials.

Resident Credentials are only for residents. Admin accounts don't have them and don't need them to reserve the court or add a business. When a Super Admin makes a resident an Admin or Super Admin, that user's Resident Credentials, including their valid ID photos, are deleted.

5.2 How to complete your Resident Credentials

1. Click **Complete Resident Credentials** on the reminder message, or open the account menu at the bottom of the sidebar and choose **My Profile**.
2. Fill in the Resident Credentials form on your profile page.
3. Click **Save Changes**. The message "Profile updated successfully." confirms it was saved.

5.3 Resident Credentials form fields

- **First Name** (required), **Middle Name** (optional) and **Last Name** (required).
- **Birthdate** (required): pick a date on the calendar. Future dates can't be picked.
- **Sex:** Male or Female.
- **Civil Status:** Single, Married, Live-in, Widowed, Annulled or Separated.
- **Contact Number:** exactly 11 digits, for example 09XXXXXXXXX.
- **Complete Address:** at least 5 characters, for example House/Unit No., Street, Purok, Barangay Maduya.
- **Valid ID Type:** National ID, TIN, Pag-IBIG, Police Clearance or NBI Clearance.

- **Valid ID Photo (Front):** required, one image up to 15 MB.
- **Valid ID Photo (Back):** optional, one image up to 15 MB.

5.4 Updating your Resident Credentials

You can update your Resident Credentials at any time. Open **My Profile**, change the fields, and click **Save Changes**. Replacing a valid ID photo removes the old photo. Saving also updates the first and last name on your account.

5.5 Who can see your Resident Credentials

Only you and the barangay's admins can see your Resident Credentials. Admins see them in the Requester Info, Complainant Info or Owner Info tab of your submissions, including your valid ID photos. Other residents can never see your Resident Credentials. Residents who follow a complaint you filed don't see who filed it.

RESIDENT GUIDE · CHAPTER 6

6. The Resident Home Page

The Home page is the first page residents see after signing in to the Barangay Maduya Portal. It has:

- **Welcome banner:** a greeting with your first name.
- **Quick Actions:** shortcuts to Request a Document, File a Complaint, Reserve the Court, Community Hub, News & Announcements and Transparency.
- **My Activity:** three cards for Document Requests, Complaints and Court Reservations. Each card shows how many you've submitted in all and how many are still pending, or "All caught up" when none are. Document requests count as pending while their status is Pending or Processing, complaints while Pending or In Progress, and court reservations while Pending. The Complaints card counts only complaints you filed, not ones you follow. Click a card to open that page.
- **Latest News:** the three most recent news posts, with pinned posts first, and a **View all** link.
- **Resident Credentials reminder:** shown at the bottom if you haven't completed your Resident Credentials yet.

7. Document Requests

7.1 About the Document Request page

The Document Request page lets residents apply online for barangay certificates and follow each request until it's ready. The page shows a card for each of the six documents residents can request, and below them the **My Requests** table, which lists every document request you've submitted. You need completed Resident Credentials to request a document.

7.2 Documents you can request

- **Barangay Clearance:** a general clearance commonly required for employment, business or legal transactions.
- **Certificate of Residency:** confirms that you currently live within Barangay Maduya.
- **Certificate of No Objection:** states that the barangay has no objection to a specific request or activity.
- **Certificate of Indigency:** proof of low-income status for financial assistance, medical or scholarship applications.
- **Solo Parent Certification:** certifies solo parent status for benefits under the Solo Parents' Welfare Act.
- **Medical / Lab Assistance:** a request for medical or laboratory financial assistance.

7.3 How to request a document

1. Click **Document Request** in the sidebar.
2. Click the card of the document you need. Its request form opens, for example "Request Barangay Clearance".
3. Fill in the form. Every document request form asks for a **Purpose** and how to **Receive Document Via**. Some documents also ask for a description of your situation, supporting documents or a payment receipt.
4. Click **Submit Request**. The message "Request submitted successfully." confirms it was sent.
5. The request appears in **My Requests** with the status **Pending** and a reference number that starts with DR.

When a document request form's purpose list includes **Other**, choosing it shows a **Specify Purpose** field, which you must fill in.

7.4 Pickup at Barangay Hall or Online Soft Copy

Every document request form has a **Receive Document Via** field with two choices:

- **Pickup at Barangay Hall:** you collect the printed document at the Barangay Hall. You must choose a **Preferred Claim Date & Time**. Claiming is Tuesday to Friday, 9:00 AM to 5:00 PM. You can pick today or a later date, in 30-minute steps. Saturdays, Sundays and Mondays can't be picked. When the document is ready, its status becomes Ready for Pickup, and you claim it at the Barangay Hall. After you claim it, the barangay marks it Claimed.
- **Online Soft Copy:** you receive a digital copy in the portal, so there's no claim date. When the document is ready, the barangay sets the request to Ready for Pickup and attaches the soft copy. Open the request's Submission Info to view and download it. Opening the Submission Info of a ready Online Soft Copy marks the request as Claimed automatically, with the date and time you opened it.

7.5 Barangay Clearance request

The Barangay Clearance request form has a **Purpose**, **Receive Document Via**, a **Payment Receipt (GCash Only)** upload for paid purposes, and a **Preferred Claim Date & Time** for pickups.

Barangay Clearance purposes that have a fee:

- Clearance for Local Employment
- Bank / Loan Requirements
- Business Clearance

Barangay Clearance purposes that are free:

- Scholarship
- Financial Support
- Hospital Support
- PAO (Public Attorney's Office)

The fee for each paid purpose is shown beside it in the Purpose list, and the **Amount due** for the selected purpose is shown below the list. Free purposes show "Free". The barangay sets the fees in Barangay Settings, and the AI Assistant can tell you the current amounts.

7.6 Paying for a Barangay Clearance with GCash

For a paid Barangay Clearance purpose, send the amount due to the barangay's GCash number shown on the form (account name: Barangay Maduya), take a screenshot of the GCash receipt, and upload it in **Payment Receipt (GCash Only)**. Only one receipt image can be uploaded.

- **Paid purpose with Online Soft Copy:** the payment receipt is required. The form shows "Upload your GCash payment receipt" if it's missing.
- **Paid purpose with Pickup at Barangay Hall:** the payment receipt is optional. You can pay when you claim the document instead.
- **Free purpose:** no payment is needed, and the receipt upload is hidden.

7.7 Certificate of Residency request

The Certificate of Residency request form asks for a **Purpose** and **Receive Document Via**, plus a **Preferred Claim Date & Time** for pickups. It has no payment step and no uploads. Certificate of Residency purposes:

- Employment Requirement
- School Requirement
- Loan or Bank Transaction
- Government Transaction
- Travel Requirement
- Medical or Financial Assistance
- Other (specify)

7.8 Certificate of No Objection request

The Certificate of No Objection request form asks for a **Purpose** and **Receive Document Via**, plus a **Preferred Claim Date & Time** for pickups. It has no payment step and no uploads. Certificate of No Objection purposes:

- Business Permit Application
- Construction or Renovation
- Tricycle / Vehicle Operation
- Special Event or Gathering
- Use of Public Space or Road
- Other (specify)

7.9 Certificate of Indigency request

The Certificate of Indigency request form asks for:

- **Purpose:** Medical Assistance, Financial Assistance, Educational Assistance / Scholarship, Burial Assistance, Government Subsidy Application, or Other (specify).
- **Brief Description of the Situation:** required. Briefly describe your situation.
- **Supporting Documents:** required, 1 to 5 files (images or documents), for example a medical referral or a hospital bill.
- **Receive Document Via**, plus a **Preferred Claim Date & Time** for pickups.

7.10 Solo Parent Certification request

The Solo Parent Certification request form asks for:

- **Purpose:** Solo Parent ID Application, Educational Assistance for Children, Medical Assistance, Livelihood Assistance, or Other (specify).
- **Brief Description of the Situation:** required.
- **Supporting Documents:** required, 1 to 5 files (images or documents), for example proof of solo parenthood.

- **Receive Document Via**, plus a **Preferred Claim Date & Time** for pickups.

7.11 Medical / Lab Assistance request

The Medical / Lab Assistance request form asks for:

- **Purpose:** Hospitalization Assistance, Laboratory / Diagnostic Test Assistance, Medicine Assistance, Surgery Assistance, or Other (specify).
- **Brief Description of the Situation:** required.
- **Supporting Documents:** required, 1 to 5 files (images or documents), for example a medical referral, a laboratory request or a hospital bill.
- **Receive Document Via**, plus a **Preferred Claim Date & Time** for pickups.

7.12 Document request statuses

A document request in the Barangay Maduya Portal has one of five statuses:

- **Pending:** the request was submitted and is waiting for the barangay to review it.
- **Processing:** the barangay is preparing the document. Submission Info shows "Being processed by" and the admin's name.
- **Ready for Pickup:** the document is ready. Submission Info shows the barangay's message in a Ready for Pickup box, any attachments such as the soft copy, and "Prepared by" with the admin's name. For a pickup, go to the Barangay Hall to claim it. For an Online Soft Copy, open Submission Info to get it.
- **Claimed:** you've received the document. Submission Info shows the **Claimed On** date and time, and "Released by" with the admin's name.
- **Rejected:** the barangay couldn't approve the request. Submission Info shows the reason in a Rejected box, any attachments, and "Rejected by" with the admin's name.

You get a notification in the portal each time the barangay changes your document request's status.

7.13 Viewing a document request

To view a document request, click its row in **My Requests**, or open its actions menu and choose **Submission Info**. The Submission Info window has two tabs:

- **Request Info:** Reference No., Status, who is handling it, Purpose, Brief Description of the Situation, Payment Receipt, Supporting Documents, Receive Document Via, Preferred Claim Date & Time, Submission Date, Claimed On, and the barangay's pickup message or rejection reason.
- **Requester Info:** the requester's Resident Credentials.

7.14 Deleting, changing or resubmitting a document request

You can delete a document request only while its status is **Pending**. Open its actions menu, choose **Delete request**, and confirm. This permanently deletes the request and all its files, and it can't be undone. Once the request is Processing or later, you can't delete it; contact the barangay instead.

Document requests can't be edited after they're submitted. To change a Pending request, delete it and submit a new one. If a request was rejected, read the reason in Submission Info, fix the problem (for example, upload a clearer receipt or update your valid ID in My Profile), and submit a new request.

RESIDENT GUIDE · CHAPTER 8

8. Complaints

8.1 About the Complaint page

The Complaint Reporting page lets residents report non-emergency community concerns to the barangay, such as noise, sanitation, public safety, traffic, damaged infrastructure, water or electricity problems, and environmental issues, and follow each report's progress. The Complaint page is only for non-emergency complaints, and it is not a blotter. You need completed Resident Credentials to file a complaint.

> **IMPORTANT**
> The Complaint page is only for non-emergency complaints, and it is not a blotter. To file a blotter, you must go to the barangay in person; a blotter can't be filed in the portal. For emergencies, call the barangay hotline shown at the top of the public website and on its Home page.

8.2 Complaints, blotters and emergencies

A complaint in the portal, a blotter and an emergency are handled in different ways:

- **Complaint (in the portal):** only for non-emergency community concerns, such as noise, uncollected garbage, a clogged drain or a broken streetlight. File it on the Complaint page. The barangay reviews it and updates its status in the portal.
- **Blotter:** the barangay's official record of an incident. A blotter can't be filed in the portal. To file a blotter, you must go to the barangay in person.
- **Emergency:** don't use the portal. Call the barangay hotline shown at the top of the public website and on its Home page.

Filing a complaint in the portal doesn't create a blotter entry. If you also need a blotter for an incident you reported in the portal, you still have to go to the barangay in person to file it.

8.3 How to file a complaint

1. Click **Complaint** in the sidebar, then **File a Complaint**. The "Report a Complaint" form opens.
2. **Subject:** briefly describe the issue (at least 3 characters).
3. **Description:** give as much detail as you can (at least 10 characters).
4. **Location of Incident** (required): click the map where it happened, drag the pin to adjust it, or click **Use Current Location**. The address of the spot appears below the map. The map shades the area outside Barangay Maduya so you can check the spot is inside the barangay.

5. **Evidence** (optional): up to 5 photos or videos.
6. Click **Submit Complaint**.

The portal then reads your complaint and assigns its category and priority automatically. If no similar complaint was filed nearby, your complaint is submitted ("Complaint submitted successfully.") with the status **Pending** and a reference number that starts with CP. If similar complaints were filed nearby, the portal asks whether yours is the same issue first.

8.4 Automatic complaint category and priority

When you file a complaint, the Barangay Maduya Portal's artificial intelligence reads the subject and description and assigns:

- **Category:** Noise, Sanitation, Public Safety, Traffic, Infrastructure, Water/Electricity, Domestic, Environment or Others.
- **Priority:** Low, Medium, High or Urgent, based on how urgently barangay officials should respond.

You don't choose the category or priority yourself, and they can't be changed after the complaint is filed. Urgent complaints appear first in the barangay admins' Needs Attention list.

8.5 How complaint priority is decided

A complaint's priority is based only on the facts it describes: the actual danger to people or property, and how many residents are affected. Every complaint is judged by the same rules:

Priority	When it's used	Examples
Urgent	An emergency happening right now, with immediate danger to life or property	A fire, live electrical wires on the ground, floodwater entering homes, violence in progress
High	A hazard that has already caused an injury or accident, or an essential service cut off for many households for a long time	A pothole that caused a motorcycle accident, no water for a whole zone for several days
Medium	An ongoing problem that disrupts daily life or could get worse, but hasn't caused harm	Potholes or damaged roads, clogged drainage, uncollected garbage, recurring noise
Low	A minor nuisance or a request with little impact	Overgrown grass, minor littering, a general suggestion

How the complaint is written doesn't change its priority. Writing in all capital letters, adding exclamation points or asking for immediate action won't raise it, so the same problem gets the same priority no matter who reports it. When a complaint falls between two levels, the lower one is used, unless the complaint describes harm that has already happened.

To help the barangay understand your complaint, describe what happened: whether anyone was hurt or an accident happened, how long the problem has lasted and how many households are affected. For an emergency, don't wait for a complaint to be reviewed: call the barangay hotline (see Complaints, blotters and emergencies above).

8.6 When the same issue was already reported nearby

Before your complaint is submitted, the portal checks for open complaints (Pending or In Progress) that other residents filed within about 150 meters of the location you picked. If it finds any, it shows up to three of them under "Is this the same issue?", with each complaint's subject, status, description, approximate address and distance, category and filing date. You can choose:

- **This is the same issue:** your own report is not submitted. Instead, the existing complaint is added to your My Complaints, and you're notified whenever its status changes. The message "Added to My Complaints. You'll be notified when its status changes." confirms it.
- **Submit as New Complaint:** your complaint is filed as usual.
- **Back:** return to your form to make changes. What you entered is kept.

To protect residents' privacy, complaints in the Noise, Domestic and Others categories are never shown as nearby matches, because they're usually about a specific person or household. You never see who filed another resident's complaint.

8.7 Following another resident's complaint

A complaint you follow appears in your My Complaints with the note "Reported by another resident". It's read-only: you can see its details and status but not who filed it. You're notified each time its status changes, with a message like "A complaint "Broken streetlight" you're following is now In Progress."

To stop following a complaint, open its actions menu and choose **Remove from My Complaints**. This also removes its notifications.

When other residents follow a complaint you filed, your complaint shows "Also reported by" and how many other residents.

8.8 My Complaints: Table and Map tabs

My Complaints lists the complaints you filed and the ones you follow. The **Table** tab shows Reference No., Subject, Category, Priority, Submission Date, Status and Actions. The **Map** tab shows each complaint as a pin colored by status: yellow for Pending, blue for In Progress, green for Resolved and red for Dismissed. Click a pin for a summary, **Directions** or **View Details**.

8.9 Complaint statuses

A complaint in the Barangay Maduya Portal has one of four statuses:

- **Pending:** the complaint was filed and is waiting for the barangay to review it.
- **In Progress:** the barangay is acting on it. Submission Info shows "Being handled by" and the admin's name.
- **Resolved:** the concern was addressed. Submission Info shows a Resolved box with the barangay's message about how it was resolved, any proof attachments, and "Resolved by" with the admin's name.
- **Dismissed:** the barangay closed the complaint without action. Submission Info shows a Dismissed box with the reason, any attachments, and "Dismissed by" with the admin's name.

You get a notification in the portal each time the barangay changes the status of a complaint you filed or follow.

8.10 Viewing a complaint

Click a complaint's row, or choose **Submission Info** in its actions menu. The window has a **Complaint Info** tab (Reference No., Status, who is handling it, followers, Category, Priority, Description, Location with a map, Evidence, Submission Date, and the resolution or dismissal details) and a **Complainant Info** tab with the complainant's Resident Credentials. The Complainant Info tab isn't shown for complaints you follow.

8.11 Deleting a complaint

You can delete a complaint only if you filed it, its status is still **Pending**, and no other residents follow it. Open its actions menu, choose **Delete complaint**, and confirm. This permanently deletes the complaint and all its files. If other residents follow your complaint, it can't be deleted, because it would disappear from their My Complaints too. Complaints can't be edited after filing.

RESIDENT GUIDE · CHAPTER 9

9. Court Reservation

9.1 About the Court Reservation page

The Court Reservation page lets residents book the barangay court for sports activities or events and track their reservations. The page has an **Availability** button, a **Reserve Court** button, and the **My Reservations** table. You need completed Resident Credentials to reserve the court.

9.2 Checking court availability

Click **Availability** and choose a date. The Court Availability window shows a timeline of the whole day from 12 AM to 12 AM, with booked times in red, and two lists: **Available** times and **Booked** times. "Fully booked." means no time is open; "No bookings yet." means the whole day is free.

Only **Approved** reservations count as booked. Other residents' Pending requests don't block a time until the barangay approves them. You can also ask the AI Assistant, for example "Is the court free on Saturday evening?" or "Bakante ba ang court bukas?"

9.3 Court reservation rules

- **Date:** today or a later date.
- **Start Time:** any time of day, to the minute.
- **Duration:** whole hours only, at least 1 hour.
- **End time:** a reservation must end by 12:00 AM (midnight) of the same date. The Duration list only offers lengths that end by midnight. For a booking that continues after midnight, make a second reservation on the next date starting at 12:00 AM.
- **No overlaps:** a reservation can't overlap an approved reservation. The form lists "Already booked on this date" and warns "This overlaps an existing reservation" if your time conflicts.

- **Purpose:** required, for example "Basketball practice" or "Barangay event".

9.4 Court fees: day rate and night rate

The court has two hourly rates, set by the barangay in Barangay Settings: a **day rate** for 6:00 AM to 6:00 PM and a **night rate** for 6:00 PM to 6:00 AM. Each hour of a reservation is billed separately. An hour is billed at the day rate only if it falls entirely between 6:00 AM and 6:00 PM. An hour with even one minute outside those hours, such as an hour that crosses 6:00 PM or 6:00 AM, is billed at the night rate.

Examples of how court reservation hours are billed:

- **8:00 AM to 11:00 AM (3 hours):** 3 hours at the day rate.
- **5:00 PM to 7:00 PM (2 hours):** 5:00 to 6:00 PM at the day rate, and 6:00 to 7:00 PM at the night rate.
- **4:30 PM to 7:30 PM (3 hours):** 4:30 to 5:30 PM at the day rate; 5:30 to 6:30 PM at the night rate because it crosses 6:00 PM; and 6:30 to 7:30 PM at the night rate. That's 1 day-rate hour and 2 night-rate hours.
- **5:01 PM to 6:01 PM (1 hour):** the night rate, because its last minute is after 6:00 PM.
- **5:30 AM to 7:30 AM (2 hours):** 5:30 to 6:30 AM at the night rate because it starts before 6:00 AM, and 6:30 to 7:30 AM at the day rate.

The reservation form shows the hour-by-hour breakdown and the **Total Amount Due** as you choose times. The AI Assistant can also calculate the fee for any times, for example "How much is the court from 4:30 to 7:30 PM?"

9.5 How to reserve the court

1. Click **Court Reservation** in the sidebar, then **Reserve Court**. The "Reserve the Court" form opens.
2. Pick the **Date**.
3. Enter the **Purpose**.
4. Choose the **Start Time** and **Duration**. The form shows when the reservation ends.
5. Check the hour-by-hour breakdown and the **Total Amount Due**.
6. **GCash Payment:** send the total amount to the barangay's GCash number shown on the form (account name: Barangay Maduya), then upload a screenshot of the receipt. The payment screenshot is required, one image.
7. Click **Reserve Court**. The message "Reservation submitted successfully." confirms it.

The reservation appears in **My Reservations** with the status **Pending** and a reference number that starts with CR. My Reservations shows each reservation's Reference No., Date, Time, Purpose, Total, Status and Actions.

9.6 Court reservation statuses

- **Pending:** waiting for the barangay's approval. A Pending reservation doesn't block the time for others yet.

- **Approved:** the reservation is confirmed, and the time is now blocked for everyone else. Submission Info shows "Approved by" and the admin's name.
- **Rejected:** the barangay didn't approve the reservation. Submission Info shows the reason in a Rejected box, for example an unreadable GCash receipt, with any attachments and "Rejected by" with the admin's name.

If another reservation for an overlapping time is approved first, the barangay can't approve yours. You get a notification each time the barangay changes your reservation's status.

9.7 Viewing, deleting or changing a court reservation

Click a reservation's row or choose **Submission Info** to see its **Reservation Info** (Reference No., Status, Date, Time, Purpose, Total Amount, GCash Payment, Submission Date and any rejection reason) and **Requester Info**.

You can delete a court reservation only while it's **Pending**: open its actions menu, choose **Delete reservation**, and confirm. Court reservations can't be edited. To change a Pending reservation, delete it and reserve again. If a reservation was rejected, make a new reservation. The portal doesn't process refunds; contact the barangay about your payment.

RESIDENT GUIDE · CHAPTER 10

10. Community Hub

10.1 About the Community Hub

The Community Hub is the Barangay Maduya business directory, where residents discover and support local businesses. Every signed-in user can browse it. Residents with completed Resident Credentials can also add their own business to the directory.

10.2 Browsing local businesses

The Community Hub has two tabs:

- **Grid:** a card for each business with its cover photo, name, category, short description, contact number, operating hours and address.
- **Map:** businesses that have a saved location, shown as pins colored by category. Click a pin to see the business's photo, name, category, description, location and contact number, with **Directions** and **View Details** buttons.

Use the search box to search by business name. Click **Filters** to choose a **Category** or tick **Only show my businesses**, then **Done**. **Clear filters** resets them.

Only businesses the barangay has **Verified** appear in the directory for other users. Your own businesses also appear, at the top of the list, in any status, with a "Your Business" badge and a status badge while they're not yet verified.

10.3 A business's details

Click a business's card to open its details: name, category, description, a button with its contact number for calling, **Visit Page** for its social media link if it has one, **Operating Hours** (days, opening time and closing time) and **Location** with a map and **Directions**.

The AI Assistant can also find businesses for you, such as "Where's the nearest karinderya?", "Is there a vulcanizing shop?" or "Bukas pa ba sila?", and show a button to open a business's details.

10.4 How to add your business to the Community Hub

1. Click **Community Hub** in the sidebar, then **Add Business**. The "Submit Your Business" form opens. If Add Business is disabled, complete your Resident Credentials first using the "Fill up your Resident Credentials first." link.
2. **Name:** at least 3 characters.
3. **Description:** at least 10 characters, describing what the business offers.
4. **Category:** choose one (see the list below).
5. **Contact Number:** 10 to 13 characters, for example 09171234567.
6. **Social Media Link** (optional): the full web address, for example https://facebook.com/yourbusiness.
7. **Operating Days:** tick at least one day from Mon to Sun.
8. **Opens** and **Closes:** the opening and closing times.
9. **Business Photos** (optional): up to 10 images. The first photo is used as the cover photo on the business's card.
10. **Business Permit** (required): one document file (PDF, Word, Excel, PowerPoint or text). Image files aren't accepted for the permit, so save a photo of your permit as a PDF first.
11. **Location** (optional): pick the business's location on the map. A business needs a location to appear on the Map tab and in "nearest" answers from the AI Assistant.
12. Click **Submit Business**. The message "Business submitted successfully." confirms it.

The business gets the status **Pending** and a reference number that starts with CH. It appears in the directory for other users only after the barangay verifies it.

Community Hub business categories: Food & Beverage, Retail, Services, Health & Wellness, Beauty & Personal Care, Education, Automotive, Agriculture, Technology and Others.

If your business closes after midnight, set a closing time earlier than the opening time, for example opens 6:00 PM and closes 2:00 AM. The same opening and closing time means the business is open all day.

10.5 Community Hub business statuses

- **Pending:** submitted and waiting for the barangay's review.
- **Processing:** the barangay is reviewing it. Submission Info shows "Being processed by" and the admin's name.
- **Verified:** approved. The business is listed in the Community Hub for all users. Submission Info shows "Verified by" and the admin's name.

- **Rejected:** not approved. Submission Info shows the reason in a Rejected box, for example an unreadable business permit, with any attachments and "Rejected by" with the admin's name.

You get a notification each time the barangay changes your business's status.

10.6 Managing your business: Submission Info, Edit and Delete

Open the actions menu on your business's card, or in the Community Hub tab of **My Profile**:

- **Submission Info:** the **Business Info** tab (Reference No., Status, any rejection reason, Category, Description, Contact Number, Social Media Link, Operating Hours, Location, Photos, Business Permit and Submission Date) and the **Owner Info** tab with your Resident Credentials.
- **Edit:** update your business's details at any time. Saving your changes submits the business for review again (see below).
- **Delete business:** permanently delete the business and all its files, in any status. This can't be undone.

10.7 Editing your business sends it back for review

When a resident edits a Community Hub business, the barangay has to check it again, so saving the changes resubmits it:

- The business's status goes back to **Pending**, whatever it was before (Pending, Processing, Verified or Rejected).
- Its submission date becomes the date of the edit, and it no longer has a handler.
- A rejected business's rejection reason and the barangay's attachments are removed.
- A **Verified** business first asks you to confirm with "Submit your business for review again?", because saving makes it unverified. Until the barangay verifies it again, other users don't see it in the Community Hub. Click **Save Changes** to resubmit it, or **Cancel** to go back to the form without saving, so the business stays verified.

You get a notification when the barangay changes its status again. If your business was rejected, read the reason in Submission Info, then choose **Edit**, fix the problem and save: there's no need to submit a new business.

A business that an admin submitted keeps its status when the admin edits it.

11. News and Announcements

11.1 About News & Announcements

The News & Announcements page has the latest updates from Barangay Maduya. Anyone can read it on the public website without signing in, and signed-in users read it in the portal. Each post has one of three categories:

- **Announcement:** general barangay announcements, such as schedules, programs and service interruptions.
- **Event:** barangay events and activities.
- **Emergency:** urgent announcements, shown with a red badge.

Posts the barangay has pinned appear at the top, marked "Pinned". All other posts are listed newest first.

11.2 Finding and reading news posts

Use the search box to search posts by title or content, and the category list to show only Announcements, Events or Emergencies. Scroll down to load more posts.

Each news post shows the author's name and role, the date and time it was posted, its category, title and content, any photos or videos (click to view them larger), and any attached documents to open or download. The public Home page shows the three latest posts in a carousel with **View full post** buttons, and the portal's Home page shows the three latest posts.

11.3 Reacting to and commenting on news posts

- **Like** and **Dislike:** signed-in users can react to a post. Click the same button again to remove your reaction, or click the other button to switch. The numbers of likes, dislikes and comments are shown on the post.
- **Comment:** opens the post's Comments window. Write a comment and send it. To reply, click **Reply** under a comment. Replies are grouped under the original comment, one level deep.
- **Deleting a comment:** you can delete your own comments. Deleting a comment also deletes the replies under it. No one can delete another user's comment.
- **Signed-out visitors** can read comments but must click **Sign In** to comment or react.

11.4 Sharing a news post

Click **Share** on a post to open a Facebook share window with a link to the post's public page. Anyone can open the link. Signed-in users who open it are taken to the same post inside the portal.

12. Transparency

12.1 About the Transparency page

The Governance Transparency page shows the projects and programs of Barangay Maduya, with their budgets and locations. Anyone can view it on the public website without signing in, and signed-in users view it in the portal.

Each transparency project shows its title, category, description, budget (in Philippine pesos, when the barangay listed one), a **View Location** button that opens the project's location on a map with **Directions**, photos or videos, attached documents, the author and the posting date. Projects are listed newest first.

Transparency project categories: Infrastructure, Health, Education, Livelihood, Social Welfare, Peace and Order, Environment and Others.

12.2 Finding transparency projects

Use the search box to search projects by title or description, and the category list to show one category. The **List** tab shows the project cards. The **Map** tab shows projects that have a location as pins; click a pin for the project's summary (location, budget and posting date) with **Directions** and **View Details**.

The budget shown is the project's budget as posted by the barangay, not necessarily the amount actually spent. Projects don't have a status such as ongoing or completed unless their description says so. The AI Assistant can list projects and give budget totals overall and per category, for example "Magkano lahat ng budget sa infrastructure?"

12.3 Reacting, commenting and sharing on projects

Transparency projects have the same **Like**, **Dislike**, **Comment** and **Share** buttons as news posts. Signed-in users can react and comment, reply to comments one level deep, and delete their own comments. Share opens a Facebook share window with a link to the project's public page.

13. Notifications

13.1 About Notifications

The Notifications page shows updates on the status of your requests and submissions. It's for residents; admin accounts don't have a Notifications page. A number beside **Notifications** in the sidebar shows how many unread notifications you have.

You get a notification whenever a barangay admin changes the status of, or deletes:

- One of your document requests.
- One of your complaints, or a complaint you follow.
- One of your court reservations.
- One of your Community Hub businesses.

13.2 What notifications say

Each notification names the submission and its new status, for example:

- "Your Barangay Clearance request is now Ready for Pickup."
- "Your complaint "Clogged drain near the chapel" is now In Progress."
- "Your court reservation for Nov 8, 2026 is now Approved."
- "Your business "Aling Nena's Karinderya" is now Verified."
- "A complaint "Broken streetlight" you're following is now Resolved."

Each notification also shows its type (Document Request, Community Hub, Court Reservation or Complaint) and how long ago it was sent, such as "5 minutes ago". Notifications older than a week show their date. Unread notifications are highlighted with a dot.

13.3 When an admin deletes your submission

If a barangay admin deletes one of your submissions, you get a notification that says it was deleted, with a red **Deleted** badge, for example:

- "Your Barangay Clearance request was deleted."
- "Your court reservation for Nov 8, 2026 was deleted."
- "Your business "Aling Nena's Karinderya" was deleted."
- "A complaint "Broken streetlight" you're following was deleted."

The submission's earlier notifications stay on your Notifications page, so you can still see its history. Because the submission no longer exists, clicking one of its notifications opens its page without Submission Info. If you don't know why it was deleted, contact the barangay using the hotlines or email shown on the public website.

13.4 Using the Notifications page

- Click a notification to mark it as read and open that submission's page with its Submission Info, where you can see the barangay's reply.
- Use the type list to show All notifications or only one type.
- Click **Mark all as read** to clear all unread notifications.
- Click **Load more** to see older notifications.

Read notifications are deleted automatically 30 days after you read them, as the top of the Notifications page says. Unread notifications are kept until you read them.

13.5 When you don't get a notification

You don't get a notification when you submit, edit or delete something yourself, when a status is set to the same status it already had, or when an Online Soft Copy is marked Claimed because you opened it. When you stop following a complaint with **Remove from My Complaints**, that complaint's notifications are removed too. Notifications appear only in the portal; the portal doesn't send them by email or text message, so check the portal for updates.

RESIDENT GUIDE · CHAPTER 14

14. About Us

The About Us page introduces Barangay Maduya. It shows:

- The barangay's **Goal, Mission & Vision**, "the direction that guides how Barangay Maduya serves its residents".
- **Barangay Officials:** a carousel of the current barangay officials with each official's photo, name and position.
- **Sangguniang Kabataan:** a carousel of the youth leaders working for the young people of Barangay Maduya.

The public Home page also has a **Barangay Officials** section. It features the first official in the Barangay Officials list (the head of the barangay) and shows the other barangay officials and the SK officials in a carousel. The barangay's admins keep the officials, their order, and the goal, mission and vision up to date in Barangay Settings. The AI Assistant can tell you who the current officials are.

15. The AI Assistant (for Residents)

15.1 Opening the AI Assistant

The AI Assistant is available on every page of the Barangay Maduya Portal after you sign in. Click the round AI Assistant button at the bottom corner of the screen to open it. The assistant isn't available on the public website.

Type your question in the box ("Ask about barangay services...") and send it. You can write in English, Filipino or Taglish. To speak instead, click the microphone button, talk for up to 60 seconds, and click it again to stop. Your speech is written into the message box so you can check it before sending. Your browser asks for permission to use the microphone the first time.

Before your first message, the assistant shows "How can I help you today?" with a **Show example questions** button. Click it to see a list of example questions, then tap one to ask it, or type your own question instead.

15.2 What the AI Assistant can help residents with

- **Barangay services and the portal:** how to request documents, file complaints, reserve the court and use the Community Hub, and what each service requires.
- **Barangay information:** the current hotlines, email, address, GCash number, Barangay Clearance fees, court rates, goal, mission and vision, and the Barangay and SK officials.
- **Your submissions:** the status of your document requests, complaints (filed and followed), court reservations and businesses, and the barangay's reply, such as why one was rejected. It looks at your 10 most recent submissions of each kind.
- **Court fees and availability:** the fee for specific times, and when the court is free on a date, such as "bukas" or "Sabado ng gabi".
- **Local businesses:** what's in the Community Hub, what's nearby, their hours, whether they're open now, and their contact numbers and addresses.
- **News and announcements:** events, emergencies, brownouts and water interruptions posted by the barangay.
- **Transparency projects:** the barangay's projects and their budget totals.
- **General barangay questions:** for example what a barangay clearance is for, or how disputes are settled at the barangay.

15.3 Buttons in the AI Assistant's replies

The AI Assistant doesn't submit, change or delete anything for you. Instead, it shows buttons under its reply:

- **Form buttons**, such as "Request Barangay Clearance" or "File a Complaint", open the form on its page. Details you already gave in the chat are filled in. For example, "I need a clearance for my new job" opens the Barangay Clearance form with the purpose Clearance for Local Employment. Check the form, add uploads and any missing details, and submit it yourself.

- **Page buttons**, such as "Go to Community Hub", open a portal page.
- **Record buttons** open one of your submissions' Submission Info, a business's details, a news post or a transparency project. The assistant shows up to 3 of these buttons per reply.

15.4 Sharing your location with the AI Assistant

When you ask for something near you, such as "Saan ang pinakamalapit na karinderya?", the assistant asks your browser for your location, and the browser asks for your permission. Your location is used only to sort businesses by distance. Distances are approximate straight-line distances. If you don't allow it, the assistant lists the matching businesses with their addresses instead.

15.5 Limits of the AI Assistant

- The AI Assistant only helps with Barangay Maduya and the portal. It politely declines unrelated requests, such as homework, coding or general trivia.
- It can only see your own submissions, never other residents'.
- It can make mistakes. Check important details, such as dates and amounts, on the page before you act on them.
- The conversation stays while you move between portal pages, but it starts over when you reload the page or sign out.

15.6 Example questions for the AI Assistant

- "Paano mag-request ng barangay clearance?"
- "What do I need for a Certificate of Indigency?"
- "Ano na ang status ng clearance ko?"
- "Bakit na-reject yung reservation ko?"
- "Bakante ba ang court sa Sabado ng gabi?"
- "Magkano ang court from 4:30 to 7:30 PM?"
- "Saan ang pinakamalapit na karinderya?"
- "May brownout o water interruption ba ngayong linggo?"
- "Sino ang mga barangay officials?"
- "I want to file a complaint about a broken streetlight."

PART III

Administrator Guide

ADMINISTRATOR GUIDE · CHAPTER 16

16. Admin Roles and the Admin Home Page

16.1 What Admins and Super Admins can do

Barangay admins use the Barangay Maduya Portal to handle residents' submissions and manage the barangay's information.

Admins can:

- Review and update the status of all residents' document requests, complaints, court reservations and Community Hub businesses, and delete any of them.
- Generate AI Insights for complaints.
- Create news posts and transparency projects, and edit or delete their own.
- Manage Barangay Settings: fees, the GCash number, the goal, mission and vision, contact information, the Barangay and SK officials, and the AI Assistant's knowledge base documents.
- View all users in User Management and ban or unban resident accounts.
- Reserve the court (approved automatically, no payment) and submit businesses (verified automatically).
- See the changes they made themselves in the **Audit Logs** tab of their profile.

Super Admins can do everything Admins can, and also:

- Change any user's role to Resident, Admin or Super Admin.
- Ban or unban admin accounts.
- Delete user accounts, and erase all data of deleted users.
- Edit or delete news posts and transparency projects written by any admin.
- View the **Audit Logs** of every admin's changes: the Audit Logs page in the sidebar, the Audit Logs of each submission, news post and transparency project, and the Audit Logs tab on other admins' profiles.

Admin accounts don't request documents or file complaints; those forms appear only for residents. Admins don't have a Notifications page or Resident Credentials.

16.2 The admin Home page

The admin Home page in the Barangay Maduya Portal has four parts:

- **Welcome banner:** "Manage barangay services, monitor resident activity, and keep the community informed."

- **Management Shortcuts:** User Management, Document Requests, Complaints, Court Reservations, Community Hub, and News & Announcements.
- **Pending Requests:** four cards counting the submissions whose status is Pending, awaiting review: Document Requests, Community Hub, Court Reservations and Complaints. Click a card to open its page.
- **Needs Attention:** up to 8 open submissions to act on first. It includes document requests that are Pending or Processing, complaints that are Pending or In Progress, court reservations that are Pending, and businesses that are Pending or Processing. Urgent complaints come first; everything else is ordered by how long it has waited, oldest first. Each item shows the document type, complaint subject, reservation purpose or business name, who submitted it, when, and a badge with the complaint's priority or the submission's status. Click an item to open its Submission Info. When nothing is open, it shows "All caught up".

16.3 Review tools shared by all submission pages

The admin views of the Document Request, Complaint, Court Reservation and Community Hub pages share the same tools:

- **Stat cards:** the total number of submissions and how many are pending.
- **Search box** and a **sort** list: Newest first or Oldest first, by submission date.
- **Filters:** a window of filters with a count of active filters, **Clear filters** and **Done**. Every page has an "Only show ... I'm handling" option.
- **Submission Info:** click a row to see all details, including the resident's Resident Credentials and valid ID photos in the Requester Info, Complainant Info or Owner Info tab. The **View Profile** button at the bottom of that tab opens the resident's profile page with all their submissions.
- **Set status:** in the row's actions menu. Choosing a status that needs a message, such as Ready for Pickup, Rejected, Resolved or Dismissed, opens a window for it first.
- **Delete:** admins can delete any submission at any status. Deleting is permanent and also removes the submission's files. The resident gets a notification that it was deleted (for a complaint, its followers too), and the submission's earlier notifications stay on their Notifications page.
- **Audit Logs** (Super Admins only): in the row's actions menu, the changes admins made to that submission (see the Audit Logs chapter).

Every status change, and every deletion by an admin, is recorded in the Audit Logs.

16.4 Handlers and status changes

When an admin changes a submission's status, that admin becomes the submission's **handler**. Residents see the handler's name in Submission Info, for example "Being processed by", "Prepared by", "Released by", "Approved by", "Verified by", "Resolved by", "Dismissed by" or "Rejected by". Setting a submission back to **Pending** clears its handler. The "Only show ... I'm handling" filter and the AI Assistant use the handler to find the submissions you're handling.

Every status change sends the resident a notification, unless the status didn't actually change or the submission is your own. For complaints, residents who follow the complaint are notified too.

Moving a submission away from a status removes that status's reply: leaving Rejected removes the rejection reason and its attachments, leaving Resolved or Dismissed removes the resolution message or dismissal reason and attachments, and setting a document request to anything other than Ready for Pickup or Claimed removes its pickup message and attachments. Those attached files are deleted.

17. Managing Document Requests

17.1 The admin Document Request page

The admin view of the Document Request page lists every resident's document request.

- **Stat cards:** Total Requests (all requests in the system) and Pending (awaiting review).
- **Search:** by requester name, requester email or reference number (for example DR-12).
- **Sort:** Newest first or Oldest first.
- **Filters:** Document Type, Status, Receive Document Via (Pickup at Barangay Hall or Online Soft Copy), From and To dates (submission date), and "Only show requests I'm handling".
- **Table columns:** Reference No., Requester (name and email), Document Type, Submission Date, Status and Action.

17.2 Reviewing a document request

Open the request's Submission Info. In **Request Info**, check the purpose, the description of the situation, the payment receipt (for a paid Barangay Clearance), the supporting documents (for Indigency, Solo Parent and Medical / Lab Assistance requests), how the resident wants to receive it, and their preferred claim date and time. In **Requester Info**, check the resident's details and valid ID. A paid Barangay Clearance for pickup may have no receipt, because the resident can pay when they claim it.

17.3 Document request workflow

To process a resident's document request, open the request's actions menu (the three-dots button at the end of its row) on the Document Request page, choose **Set status**, and pick the new status. The resident gets a notification each time you change it. A request usually goes from Pending to Processing, then Ready for Pickup, then Claimed, or to Rejected:

1. **Processing:** set this when you start preparing the document. The resident sees "Being processed by" and your name.
2. **Ready for Pickup:** opens the **Pickup Details** window. Enter a **Message** (required) to let the requester know their document is ready, for example "Your document is ready for pickup at the Barangay Hall." Optionally add **Attachments**, up to 5 images or documents, such as a soft copy of the document. For an **Online Soft Copy** request, attach the soft copy here: it's how the resident receives the document. Click **Mark as Ready for Pickup**.
3. **Claimed:** for a **Pickup at Barangay Hall** request, set Claimed when the resident collects the document. It records the Claimed On date and shows "Released by" with your name. The

Claimed option appears only for pickup requests: an Online Soft Copy becomes Claimed automatically when its requester opens its Submission Info while it's Ready for Pickup.

4. **Rejected:** opens the **Rejection Details** window. Enter a **Reason** (required), for example "Your submitted valid ID is unreadable. Please resubmit a clearer copy." Optionally add up to 5 images or documents. Click **Reject Request**.

Setting a Claimed request back to Ready for Pickup keeps its existing pickup message and attachments, without opening the Pickup Details window again.

ADMINISTRATOR GUIDE · CHAPTER 18

18. Managing Complaints

18.1 The admin Complaint page

The admin view of the Complaint page lists every resident's complaint.

- **Stat cards:** Total Complaints and Pending.
- **Table** and **Map** tabs. The Map tab shows every complaint that matches the search and filters, as pins colored by status (yellow Pending, blue In Progress, green Resolved, red Dismissed), with **Directions** to each one.
- **Search:** by subject, complainant name or email, or reference number (for example CP-3).
- **Filters:** Category, Priority, Status, From and To dates, and "Only show complaints I'm handling".
- **Table columns:** Reference No., Subject (with the complainant's name, and how many other residents follow it), Category, Priority, Submission Date, Status and Action.

18.2 Complaint workflow

To act on a resident's complaint, open the complaint's actions menu (the three-dots button at the end of its row) on the Complaint page, choose **Set status**, and pick the new status. The complainant and every resident following the complaint get a notification each time you change it.

- **In Progress:** set this when the barangay starts acting on the complaint. The complainant and followers see "Being handled by" and your name.
- **Resolved:** opens the **Resolution Details** window. Enter a **Message** (required) telling the complainant how the concern was resolved, for example "The reported issue has been addressed by barangay personnel." Optionally attach proof of resolution, up to 5 images or documents. Click **Mark as Resolved**.
- **Dismissed:** opens the **Dismissal Details** window. Enter a **Reason** (required), for example "This complaint could not be validated based on the submitted evidence." Optionally attach up to 5 images or documents. Click **Dismiss Complaint**.

A complaint's category and priority are set automatically when it's filed and can't be changed in the portal. When other residents follow a complaint, Submission Info shows "Also reported by" and how many residents. Followers are notified of every status change, along with the complainant. Deleting a complaint removes it from its followers' My Complaints too, and the complainant and followers get a notification that it was deleted.

18.3 AI Insight for complaints

The **AI Insight** tab in a complaint's Submission Info is only for admins. Click **Generate Insight** to get an AI-generated assessment to help plan the barangay's response:

- **Budget Estimate:** an estimated budget range in Philippine pesos.
- **Estimated Manpower:** the number and type of personnel needed.
- **Estimated Timeframe:** how long resolving it may take.
- **Public Safety Risk:** None, Low, Medium or High, if left unresolved.
- **Suggested Solution:** a recommended course of action.
- **Required Resources:** materials, equipment or resources needed.
- **Prevention Advice:** how to prevent similar complaints in the future.

The insight is saved with the complaint, so other admins see it too. Click **Regenerate** for a new one. Residents never see AI Insights. Treat the estimates as a planning aid and check them before acting.

ADMINISTRATOR GUIDE · CHAPTER 19

19. Managing Court Reservations

19.1 The admin Court Reservation page

The admin view of the Court Reservation page lists every court reservation.

- **Stat cards:** Total Reservations and Pending.
- **Availability** and **Reserve Court** buttons, the same as residents have.
- **Search:** by requester name or email, or reference number (for example CR-7).
- **Filters:** Reservation Date, Status, and "Only show reservations I'm handling".
- **Table columns:** Reference No., Requester, Schedule (date and time), Purpose, Status and Action.

19.2 Approving and rejecting reservations

To approve or reject a resident's court reservation, first open its Submission Info and check that the **GCash Payment** screenshot matches the **Total Amount**. Then open the reservation's actions menu (the three-dots button at the end of its row) on the Court Reservation page, choose **Set status**, and pick the new status. The resident gets a notification each time you change it.

- **Approved:** the portal checks the time against other approved reservations on the same date. If they overlap, the approval is blocked with "This reservation's time overlaps another approved reservation." Only approved reservations block a time, so several residents can request the same time; approve one and reject the others.
- **Rejected:** opens the **Rejection Details** window. Enter a **Reason** (required), for example "The uploaded GCash payment receipt is unreadable. Please resubmit a clearer copy." Optionally attach up to 5 images or documents. Click **Reject Reservation**.
- **Pending:** returns the reservation to the queue and clears its handler.

19.3 Reserving the court as an admin

Admins can reserve the court directly with **Reserve Court**. The page says: "Need to reserve the court? Create a reservation directly — it will be approved automatically." The admin's reservation form has no GCash payment upload. The reservation is created as **Approved** with the admin as its handler. It still can't overlap an approved reservation, and its total amount is still calculated from the rates and shown.

ADMINISTRATOR GUIDE · CHAPTER 20

20. Managing the Community Hub

20.1 The admin Community Hub page

The admin view of the Community Hub lists every business, in every status.

- **Stat cards:** Total Businesses and Pending Review. Pending Review counts businesses that aren't verified yet: Pending, Processing or Rejected.
- **Table**, **Grid** and **Map** tabs.
- **Search:** by business name or reference number (for example CH-5).
- **Filters:** Category, Status, From and To dates, "Only show businesses I'm handling" and "Only show my businesses".
- **Table columns:** Reference No., Business, Category, Contact, Submitted, Status and Action.

20.2 Verifying and rejecting businesses

To verify or reject a resident's business, open its Submission Info. In **Business Info**, check its details and the **Business Permit** document; in **Owner Info**, check the owner's Resident Credentials. Then open the business's actions menu (the three-dots button on its row or card) on the Community Hub page, choose **Set status**, and pick the new status. The owner gets a notification each time you change it:

- **Processing:** you're reviewing it.
- **Verified:** the business appears in the Community Hub for all users.
- **Rejected:** opens the **Rejection Details** window. Enter a **Reason** (required), for example "The submitted business permit is unreadable. Please resubmit a clearer copy." Optionally attach up to 5 images or documents. Click **Reject Business**.

Businesses submitted by an admin with **Add Business** are verified automatically. Only a business's owner can edit it; admins can't edit residents' businesses, but they can delete any business.

20.3 Businesses that come back after an edit

When a resident edits their business, it goes back to **Pending** so the barangay can check the changes, even if it was already Verified or Rejected. Its handler and any rejection reason are cleared, and its submission date becomes the date of the edit, so it appears at the top of the newest-first list. An edited Verified business is hidden from other users until you verify it again. Review it the same way as a new business. Admins' own businesses keep their status when the admin edits them.

21. Publishing News and Announcements

21.1 Creating a news post

Admins see a **Create News** button on the News & Announcements page. It opens the "Create News Post" form:

- **Title:** at least 3 characters.
- **Category:** Announcement, Event or Emergency.
- **Content:** at least 10 characters. Line breaks and blank lines you type are kept when the post is shown, so you can split the content into paragraphs or lists.
- **Media** (optional): up to 10 images or videos.
- **Attachments** (optional): up to 3 documents.
- **Pin to top:** keeps the post at the top of News & Announcements and of the latest-news sections until it's unpinned.

Click **Create** to publish. The message "News post created successfully." confirms it. The post is visible to everyone immediately, including on the public website.

21.2 Editing and deleting news posts

Open the three-dots menu on a post and choose **Edit** or **Delete**. Only the post's author or a Super Admin can edit or delete it. Deleting a post is permanent and also removes its comments and reactions. No one, including admins, can delete another user's comment.

Posting, editing and deleting news posts are recorded in the Audit Logs. Super Admins also see **Audit Logs** in a post's three-dots menu, with the changes admins made to that post. Admins can click a post's author picture to open the author's profile page.

21.3 Tips for writing news posts

- Use the **Emergency** category for urgent announcements; it's shown with a red badge.
- For brownouts, water interruptions and events, write the date and time of the event in the post's content. The posting date is when the post went up, not when the event happens, and residents' AI Assistant reads the content to answer questions like "May brownout ba ngayong linggo?"
- Pin only the posts residents need to see first, and unpin them when they're no longer current.

22. Managing Transparency Projects

22.1 Adding a transparency project

Admins see an **Add Project** button on the Transparency page. It opens the "Add Transparency Project" form:

- **Title:** at least 3 characters.
- **Category:** Infrastructure, Health, Education, Livelihood, Social Welfare, Peace and Order, Environment or Others.
- **Description:** at least 10 characters. Line breaks and blank lines you type are kept when the project is shown.
- **Budget** (optional): the amount in Philippine pesos, zero or more, for example 150000.
- **Location** (optional): pick the project's location on the map. Projects with a location appear on the Map tab.
- **Media** (optional): up to 10 images or videos.
- **Attachments** (optional): up to 3 documents.

The message "Project created successfully." confirms it.

22.2 Editing and deleting transparency projects

Open the three-dots menu on a project and choose **Edit** or **Delete**. Only the project's author or a Super Admin can edit or delete it. Posting, editing and deleting projects are recorded in the Audit Logs, and Super Admins see **Audit Logs** in a project's three-dots menu.

The AI Assistant adds up project budgets overall and per category. Projects without a budget aren't counted in those totals. Because projects have no status field, write in the description whether a project is planned, ongoing or completed if residents should know.

23. User Management

23.1 The User Management page

User Management is for admins only; residents who open it are sent back to the Home page. It has two stat cards, **Residents** (registered residents) and **Admins** (Admins and Super Admins), and two tabs: **Active Users** and **Deleted Users**.

23.2 Active Users

The **Active Users** tab lists every account. Search by name or email, and filter by role: All Roles, Resident, Admin or Super Admin. The columns are User (name and email), Role, Status (a "Banned" badge for banned accounts), Joined, Last Sign In and Actions. Click a user's row to open their profile page. The actions menu has:

- **View Profile:** open the user's profile page: a resident's Resident Credentials and submissions, or an admin's businesses, court reservations, news posts and transparency projects. Available to all admins.
- **Role** (Super Admins only): **Set as Admin**, **Set as Super Admin** or **Set as Resident**. Making a resident an Admin or Super Admin deletes their Resident Credentials, including their valid ID photos, because admins don't have them. If the change doesn't show for the user right away, they can reload the page or sign out and back in.
- **Ban User** / **Unban User:** a banned user can't sign in to the portal until they're unbanned. Admins can ban and unban residents. Only a Super Admin can ban or unban an admin. No one can ban their own account.
- **Delete User** (Super Admins only): permanently deletes the user's account. No one can delete their own account. The user's submitted data stays in the system and appears under Deleted Users, where it can be erased separately.

The same Role, Ban and Delete actions are in the actions menu beside the user's name on their profile page. Role changes, bans, unbans, account deletions and data erasures are all recorded in the Audit Logs.

23.3 Deleted Users

The **Deleted Users** tab lists accounts that were deleted, with their name, email, role, join date and deletion date. Search by name or email, and click a row to open the user's profile. The actions menu has:

- **View Profile:** shows "Deleted User" with the records the user left behind.
- **Delete All User Data** (Super Admins only): permanently deletes every record the user left in the portal: news posts, comments, reactions, resident profile, document requests, complaints and complaint follows, transparency posts, businesses, court reservations, and their entry in the Deleted Users list, along with every file they uploaded. This can't be undone.

24. Barangay Settings

24.1 About Barangay Settings

The Barangay Settings page is for admins only. It manages fees, the goal, mission and vision, contact information, the Barangay and SK officials, and the AI Assistant's knowledge base. Each section from Document Pricing to Contact Information has its own save button, and "Settings updated." confirms a save. The officials lists and the knowledge base have no section save button: each addition, change or removal is saved as soon as you make it. Everything in Barangay Settings is also given to the AI Assistant with every question, so keeping it current keeps the assistant's answers correct.

Every save that changes a setting is recorded in the Audit Logs, with each changed field's old and new value, for example a clearance fee or the court's night rate. Adding, editing, removing and reordering officials are recorded too.

24.2 Document Pricing

- **GCash Number:** 10 to 13 characters, for example 0917-123-4567. It's shown to residents on the Barangay Clearance request form and the court reservation form, with the account name Barangay Maduya.
- **Clearance for Local Employment Fee**, **Bank / Loan Requirements Fee** and **Business Clearance Fee:** the fees, zero or more, for the paid Barangay Clearance purposes. The free purposes (Scholarship, Financial Support, Hospital Support and PAO) are always free.

Click **Save Document Pricing**. New fees apply to the request forms immediately.

24.3 Court Reservation Fees

- **Day Rate (6:00 AM - 6:00 PM):** charged per hour. Only hours that fall entirely within 6:00 AM to 6:00 PM use this rate.
- **Night Rate (6:00 PM - 6:00 AM):** charged per hour, including any hour that crosses 6:00 AM or 6:00 PM by at least 1 minute.

Click **Save Court Fees**. New rates apply to new reservations; existing reservations keep the total calculated when they were made.

24.4 Goal, Mission & Vision

Edit the barangay's **Goal**, **Mission** and **Vision**, up to 2,000 characters each, then click **Save Goal, Mission & Vision**. They're shown on the About Us page and the public Home page.

24.5 Contact Information

- **Hotline 1** (required): also shown as the emergency hotline on the public Home page.
- **Hotline 2** (optional): leave it blank if the barangay has only one hotline.
- **Email:** the barangay's email address.

- **Address:** shown in the public Home page's footer.

Phone numbers may contain digits, spaces, dashes, parentheses and +, for example (046) 412 4977. The hotlines and email are shown at the top of every public page. Click **Save Contact Information**.

24.6 Barangay Officials and Sangguniang Kabataan

The **Barangay Officials** and **Sangguniang Kabataan** lists manage the officials shown on the About Us page and the public Home page.

- **Add Official** (Barangay Officials) or **Add SK** (Sangguniang Kabataan): enter the **Full Name** (at least 2 characters), **Position** (for example Kagawad) and **Photo** (required, one image). New officials go to the end of the list.
- **Edit:** change an official's name, position or photo.
- **Remove:** removes the official from the list after you confirm. This can't be undone.
- **Reorder:** drag an official by the handle to a new position. The new order is saved automatically.

The order is the order shown on About Us and the Home page. The first official in the Barangay Officials list is featured on the public Home page as the head of the barangay, so put the Punong Barangay first.

24.7 AI Assistant Knowledge Base

The last section of Barangay Settings, **AI Assistant Knowledge Base**, lists the PDF documents the AI Assistant answers residents' and admins' questions from, such as this user manual. Here admins add PDFs by dragging them onto the box or clicking to select them, download a document by clicking it, and remove outdated documents with the trash button. See Managing the knowledge base documents in the AI Assistant chapter for the full steps.

ADMINISTRATOR GUIDE · CHAPTER 25

25. Audit Logs

25.1 About the Audit Logs

The Audit Logs are the Barangay Maduya Portal's record of the changes admins make in the portal: who did what, when, and each changed field's value before and after. They keep the barangay's staff accountable and answer questions such as who rejected a request or who changed a fee.

- **Super Admins** can see every admin's changes: on the **Audit Logs** page in the sidebar, in the **Audit Logs** of each record, and in the Audit Logs tab of any admin's profile.
- **Admins** can see only their own changes, in the **Audit Logs** tab of their profile. The Audit Logs page is only for Super Admins; an admin who opens its link is sent back to the Home page.
- **Residents** can't see the Audit Logs. Residents' own actions, such as submitting a request or posting a comment, aren't recorded in them.

Audit log entries can't be edited or deleted in the portal. They stay even after the admin's account is deleted, with "(deleted)" after the admin's name.

25.2 What the Audit Logs record

Each entry has a **Category**, what the change was about, and an **Action**, what was done.

Category	What's recorded
Document Request	Status changes, and deletions by admins
Complaint	Status changes, and deletions by admins
Court Reservation	Status changes, and deletions by admins
Community Hub	Status changes, admins' edits to their own businesses, and deletions by admins
News & Announcements	Posting, editing and deleting news posts
Transparency	Posting, editing and deleting transparency projects
Officials	Adding, editing, removing and reordering Barangay and SK officials
Barangay Settings	Saved changes to fees, court rates, the GCash number, the goal, mission and vision, and contact information
AI Knowledge Base	Adding and removing knowledge base documents. Older entries, from when each upload replaced the previous document, have the action Replaced
User	Role changes, bans and unbans, account deletions, and erasing a deleted user's data

The actions are Created, Updated, Deleted, Status Changed, Reordered, Replaced, Role Changed, Banned, Unbanned and Data Deleted.

Each entry's **Details** is a one-line description that names the record, for example:

- "Changed DR-12 (Barangay Clearance) from Pending to Rejected"
- "Posted event "Barangay Clean-up Drive""
- "Updated Clearance Fee (Clearance for Local Employment), Court Night Rate"
- "Banned Juan dela Cruz (juan@example.com)"
- "Changed Maria Santos's role from Resident to Admin and cleared their Resident Credentials"

25.3 Using the Audit Logs page

Super Admins open **Audit Logs** in the sidebar. The page, "A record of the changes admins make in the portal", lists the entries newest first and loads more as you scroll down. Its columns are:

- **Date & Time:** when the change was made, in Philippine time.
- **Done By:** the admin's name, and their role when they made the change.
- **Category** and **Action:** the action is a badge, shown in red for Deleted, Data Deleted and Banned.
- **Details:** the entry's one-line description.

To find entries:

- **Search** ("Search by admin, reference no., or details..."): matches an admin's name or email, or words in the Details, such as a reference number (DR-12), a title or a person's name.

- **Filters:** opens the **Filter Audit Logs** window with **Category**, **Action**, **From** and **To**. The From and To dates include the whole of each day. The Filters button shows how many filters are active; **Clear filters** resets them and **Done** closes the window.

25.4 Audit log details

Click an entry to open **Audit Log Details**:

- The entry's Details at the top.
- **Date & Time**, **Done By** (the admin's name, role and email), **Category** and **Action**.
- **Changes:** for each changed field, its value **Before** and **After**. A dash means there was no value, for example before a record was created or after it was deleted.
- **Open Record:** opens what the entry is about: a submission's Submission Info, a news post, a transparency project, Barangay Settings (for settings, officials and knowledge base entries) or a user's profile. It isn't shown when the entry is the record's deletion.

25.5 The Audit Logs of one record

For Super Admins, the actions menu of every document request, complaint, court reservation and Community Hub business, and the three-dots menu of every news post and transparency project, has **Audit Logs**. It opens a window with the changes admins made to that record, newest first. Click an entry to see its details, and **Load more** for older entries. A record no admin has changed yet shows "No audit logs yet".

25.6 Your own changes in the Audit Logs (Admins)

Every admin's profile page has an **Audit Logs** tab with the changes that admin made. It has the same search (by reference number or details) and filters as the Audit Logs page, without the Done By column. Admins see their own tab in **My Profile**; Super Admins see the tab on every admin's profile.

25.7 Asking the AI Assistant about the Audit Logs

The admins' AI Assistant answers questions about the Audit Logs, for example "Sino ang nag-reject ng DR-12?", "Ano ang mga binago ko kahapon?", "Who changed the clearance fees?" or "Ilang complaint ang na-resolve ngayong linggo?". For Super Admins, it searches every admin's changes. For other admins, it searches only their own changes, the same ones as on their profile's Audit Logs tab.

26. The AI Assistant for Admins and the Knowledge Base

26.1 What the AI Assistant can do for admins

Admins have their own AI Assistant in the Barangay Maduya Portal, with these abilities in addition to the residents' information questions:

- **Your handled submissions:** the residents' document requests and complaints you're handling, and the court reservations and businesses you submitted yourself.
- **The barangay's workload:** how many submissions are in each status, how many open complaints there are at each priority, and what needs attention first, matching the Home page's Needs Attention list. For example: "Ilan ang pending na document requests?" or "Ano ang kailangan kong asikasuhin ngayon?"
- **Opening any submission:** give a reference number, for example "Pakita yung DR-12", and the assistant shows a button to open its Submission Info.
- **The Audit Logs:** who posted, added, changed, reviewed or deleted something and when, what an admin did on a day, and how many changes of a kind were made in a period. For example: "Sino ang nag-reject ng DR-12?", "Sino ang nag-post ng announcement tungkol sa brownout?", "Ano ang mga binago ko kahapon?", "Who changed the clearance fees?" or "Ilang complaint ang na-resolve ngayong linggo?". The assistant counts the matching changes for you, and its answers give who did each change, when, and the values before and after.
- **Admin forms:** Create a News Post, Add a Transparency Project, Add a Barangay Official, Add an SK Official, Reserve the Court and Submit a Business, filled in from your message. For example, "Add Juan dela Cruz as a kagawad" opens the Add Official form with the name and position filled in.
- **Pages:** for example, "Gusto kong palitan ang clearance fees" shows a button to Barangay Settings, and for Super Admins, "Pakita yung audit logs page" shows a button to the Audit Logs page.

The admin assistant doesn't open residents' forms, such as document requests or the complaint form, because admin accounts don't submit those.

What the assistant can see in the Audit Logs depends on your role, the same as in the portal:

- **Super Admins:** every admin's changes. You can ask about a specific admin, for example "Ano ang mga ginawa ni Juan ngayong linggo?", or "Sinong admin ang may pinakamaraming binago ngayong linggo?".
- **Admins:** only your own changes. If you ask about another admin's changes or ask for the Audit Logs page, the assistant explains that only Super Admins can see those, and that your own changes are on the Audit Logs tab of your profile.

The assistant reads the 30 most recent matching changes. When more match, it tells you to see them all on the Audit Logs page (or your profile's Audit Logs tab), or to narrow the question by

date or category.

26.2 Example questions for admins

Before your first message, the assistant shows "How can I help you today?" with a **Show example questions** button. The admins' examples include "Ano ang kailangan kong asikasuhin ngayon?", "Ilan ang pending na document requests?", "Ilang high-priority complaints ang open?", "Gusto kong mag-post ng announcement." and "Saan ko pwedeng i-manage ang mga user account?". Tap one to ask it, or type your own question.

26.3 Managing the knowledge base documents

The knowledge base is the set of PDF reference documents the AI Assistant answers from: this user manual, and any other documents about the barangay's requirements, schedules and policies. Admins manage it in the **AI Assistant Knowledge Base** section at the bottom of the **Barangay Settings** page.

- **Adding documents:** drag and drop one or more PDFs onto the box ("Drag & drop PDFs here, or click to select"), or click it to select them. Each PDF can be up to 15 MB. The PDFs are processed one at a time, and the box shows "Processing document..." until they're done. Each one can take up to a minute. A message with the file's name and "was added to the knowledge base." confirms each document.
- **The document list:** every document's file name, how many chunks (passages) were indexed, who uploaded it and when. Click a document to download it. When there are none, the list shows "No knowledge base documents uploaded yet."
- **Removing a document:** click the trash button beside it, then **Remove** in the "Remove manual.pdf?" window. The assistant stops answering from it right away. This can't be undone. A message with the file's name and "was removed from the knowledge base." confirms it.

The assistant uses every document in the list. Adding a new version of a document doesn't replace the old one, so remove the outdated version after adding the new one. Otherwise the assistant may answer from either version.

Each PDF must contain selectable text. A scanned PDF made only of images can't be processed, and a "Failed to process" message with the file's name appears. If one PDF fails, the others are still added.

Adding and removing knowledge base documents are recorded in the Audit Logs under AI Knowledge Base.

26.4 How the AI Assistant uses the knowledge base

The Barangay Maduya Portal splits each knowledge base PDF's text into short passages. For each question, the assistant receives the few passages most related to it, from all the documents together, along with the name of the document each passage came from. It answers from them and mentions that the information comes from the barangay's reference documents. The live Barangay Settings and officials lists always take priority over the documents. If no knowledge base document has been uploaded, the assistant tells residents that an admin hasn't uploaded the reference document yet, and tells admins they can upload one in the AI Assistant Knowledge Base section of Barangay Settings.

Tips for knowledge base documents that work well:

- Write each topic so it makes sense on its own and names the service it's about, because the assistant reads short passages, not the whole document.
- Include barangay-specific requirements, schedules and policies that the portal itself doesn't show.
- Don't rely on it for fees, contact details or officials; the assistant already gets those live from Barangay Settings.
- Give each document a clear file name, such as "clearance-requirements.pdf", and keep only one version of each document in the list.
- When services or policies change, add the new version and remove the old one.

PART IV

Reference

REFERENCE · CHAPTER 27

27. Status Reference

27.1 Statuses of every submission type

Document requests:

- **Pending:** submitted, waiting for review.
- **Processing:** the barangay is preparing the document.
- **Ready for Pickup:** ready to claim at the Barangay Hall, or the soft copy is attached in Submission Info.
- **Claimed:** the resident has received the document.
- **Rejected:** not approved; the reason is in Submission Info.

Complaints:

- **Pending:** filed, waiting for review.
- **In Progress:** the barangay is acting on it.
- **Resolved:** addressed; the barangay's message is in Submission Info.
- **Dismissed:** closed without action; the reason is in Submission Info.

Court reservations:

- **Pending:** waiting for approval; doesn't block the time yet.
- **Approved:** confirmed; the time is blocked for everyone else.
- **Rejected:** not approved; the reason is in Submission Info.

Community Hub businesses:

- **Pending:** submitted, waiting for review.
- **Processing:** being reviewed.
- **Verified:** listed in the Community Hub for all users.
- **Rejected:** not approved; the reason is in Submission Info.

27.2 Who can delete a submission, and when

- **Document request:** the requester while it's Pending; admins at any status.
- **Complaint:** the complainant while it's Pending and no other residents follow it; admins at any status.
- **Court reservation:** the requester while it's Pending; admins at any status.

- **Community Hub business:** the owner at any status; admins at any status.

Only Community Hub businesses can be edited after submitting, and only by their owner. A resident's edit sends the business back to Pending for the barangay to review again. Document requests, complaints and court reservations can't be edited; delete a Pending one and submit again instead.

When an admin deletes a resident's submission, the resident (and, for a complaint, its followers) gets a notification that it was deleted.

27.3 Handler labels in Submission Info

Submission Info names the admin handling a submission with a label that depends on its status:

- **Being processed by:** a document request or business that is Processing.
- **Being handled by:** a complaint that is In Progress.
- **Prepared by:** a document request that is Ready for Pickup.
- **Released by:** a document request that is Claimed.
- **Approved by:** an approved court reservation.
- **Verified by:** a verified Community Hub business.
- **Resolved by** and **Dismissed by:** a resolved or dismissed complaint.
- **Rejected by:** a rejected document request, court reservation or business.

A Pending submission has no handler.

REFERENCE · CHAPTER 28

28. Reference Numbers and Searching

28.1 Reference number prefixes

- **DR:** document request (for example DR-12).
- **CP:** complaint (for example CP-3).
- **CR:** court reservation (for example CR-7).
- **CH:** Community Hub business (for example CH-5).

The number after the prefix identifies the submission. Use the reference number when you contact the barangay about a submission or ask the AI Assistant about it.

28.2 Searching by reference number (admins)

On the admin views of the Document Request, Complaint, Court Reservation and Community Hub pages, the search box accepts reference numbers. Typing a full reference number such as "DR-12" finds the submissions whose number starts with 12, such as DR-12 and DR-120. Typing only digits such as "12" finds the submissions whose number contains 12. The search box also matches the submitter's name or email (and, for complaints, the subject; for businesses, the business name).

REFERENCE · CHAPTER 29

29. Uploads and Limits

29.1 Upload limits by form

Form	Upload field	Required	Max files	File types
Resident Credentials	Valid ID Photo (Front)	Yes	1	Images
Resident Credentials	Valid ID Photo (Back)	No	1	Images
Barangay Clearance	Payment Receipt (GCash Only)	For paid soft copies	1	Images
Indigency, Solo Parent, Medical / Lab	Supporting Documents	Yes	5	Images, documents
Complaint	Evidence	No	5	Images, videos
Court Reservation	GCash Payment	Yes (residents)	1	Images
Community Hub business	Business Photos	No	10	Images
Community Hub business	Business Permit	Yes	1	Documents
News post	Media	No	10	Images, videos
News post	Attachments	No	3	Documents
Transparency project	Media	No	10	Images, videos
Transparency project	Attachments	No	3	Documents
Official	Photo	Yes	1	Images
Admin replies (pickup, rejection, resolution, dismissal)	Attachments	No	5	Images, documents
AI Assistant Knowledge Base (Barangay Settings)	Knowledge base documents	No	No limit	PDF only, up to 15 MB each

29.2 File size and type limits

Every upload in the Barangay Maduya Portal accepts images up to 15 MB each, videos up to 100 MB each, and documents up to 15 MB each. Accepted document types are PDF (.pdf), Word (.doc, .docx), Excel (.xls, .xlsx), PowerPoint (.ppt, .pptx) and plain text (.txt). If a file is too large, isn't a supported type, or there are more files than the field allows, the portal shows a message and doesn't add it.

29.3 Other form limits

- **Contact Number (Resident Credentials):** exactly 11 digits.

- **Contact Number (Community Hub business):** 10 to 13 characters.
- **Complaint Subject:** at least 3 characters. **Complaint Description:** at least 10 characters.
- **Business Name:** at least 3 characters. **Business Description:** at least 10 characters.
- **Preferred Claim Date & Time:** Tuesday to Friday, 9:00 AM to 5:00 PM, in 30-minute steps, today or later.
- **Court reservation:** whole hours, at least 1 hour, ending by midnight.
- **News and project Title:** at least 3 characters. **Content / Description:** at least 10 characters.
- **Goal, Mission and Vision:** up to 2,000 characters each.
- **AI Assistant voice message:** up to 60 seconds.

REFERENCE · CHAPTER 30

30. Option Lists

30.1 Resident Credentials options

- **Valid ID Type:** National ID, TIN, Pag-IBIG, Police Clearance, NBI Clearance.
- **Sex:** Male, Female.
- **Civil Status:** Single, Married, Live-in, Widowed, Annulled, Separated.

30.2 Document request options

- **Document types:** Barangay Clearance, Certificate of Residency, Certificate of No Objection, Certificate of Indigency, Solo Parent Certification, Medical / Lab Assistance.
- **Receive Document Via:** Pickup at Barangay Hall, Online Soft Copy.
- **Barangay Clearance purposes:** Clearance for Local Employment (paid), Bank / Loan Requirements (paid), Business Clearance (paid), Scholarship (free), Financial Support (free), Hospital Support (free), PAO (Public Attorney's Office) (free).
- **Certificate of Residency purposes:** Employment Requirement, School Requirement, Loan or Bank Transaction, Government Transaction, Travel Requirement, Medical or Financial Assistance, Other.
- **Certificate of No Objection purposes:** Business Permit Application, Construction or Renovation, Tricycle / Vehicle Operation, Special Event or Gathering, Use of Public Space or Road, Other.
- **Certificate of Indigency purposes:** Medical Assistance, Financial Assistance, Educational Assistance / Scholarship, Burial Assistance, Government Subsidy Application, Other.
- **Solo Parent Certification purposes:** Solo Parent ID Application, Educational Assistance for Children, Medical Assistance, Livelihood Assistance, Other.
- **Medical / Lab Assistance purposes:** Hospitalization Assistance, Laboratory / Diagnostic Test Assistance, Medicine Assistance, Surgery Assistance, Other.

30.3 Complaint, business, news and project options

- **Complaint categories:** Noise, Sanitation, Public Safety, Traffic, Infrastructure, Water/Electricity, Domestic, Environment, Others.
- **Complaint priorities:** Low, Medium, High, Urgent.
- **Public Safety Risk (AI Insight):** None, Low, Medium, High.
- **Community Hub business categories:** Food & Beverage, Retail, Services, Health & Wellness, Beauty & Personal Care, Education, Automotive, Agriculture, Technology, Others.
- **Operating days:** Mon, Tue, Wed, Thu, Fri, Sat, Sun.
- **News categories:** Announcement, Event, Emergency.
- **Transparency project categories:** Infrastructure, Health, Education, Livelihood, Social Welfare, Peace and Order, Environment, Others.
- **User roles:** Resident, Admin, Super Admin.

30.4 Audit log options

- **Audit log categories:** Document Request, Complaint, Court Reservation, Community Hub, News & Announcements, Transparency, Officials, Barangay Settings, AI Knowledge Base, User.
- **Audit log actions:** Created, Updated, Deleted, Status Changed, Reordered, Replaced, Role Changed, Banned, Unbanned, Data Deleted.

REFERENCE · CHAPTER 31

31. Frequently Asked Questions and Troubleshooting

31.1 Accounts and Resident Credentials

How do I create an account? (Paano gumawa ng account?)

Click **Register** on the public website's top menu and follow the steps in the sign-up window. Then complete your Resident Credentials in **My Profile** so you can use the barangay's services.

Why can't I see the document request forms, the File a Complaint button or the Reserve Court button?

You haven't completed your Resident Credentials yet. Click **Complete Resident Credentials** on the page, or open **My Profile** from the account menu, fill in the form with a valid ID photo, and click **Save Changes**. If you're signed in with an admin account, the document request forms and the File a Complaint button aren't shown, because residents submit document requests and complaints from their own accounts.

How do I change my name, contact number or address?

Open **My Profile** from the account menu, update your Resident Credentials, and click **Save Changes**. Saving also updates the first and last name on your account.

Can other residents see my valid ID or personal details?

No. Only you and the barangay's admins can see your Resident Credentials, including your valid ID photos.

I can't sign in to the portal. What should I do?

Check that you're using the right sign-in details. If your account was banned by an admin, you can't sign in until it's unbanned. Contact the barangay using the hotlines or email shown at the top of the public website.

Where can I read the Privacy Policy and Terms of Service?

Click **Privacy Policy** or **Terms of Service** in the Privacy and Terms section or at the bottom of the public Home page, or the links in the sign-in and sign-up windows. Both pages are public, so you can read them without signing in.

What happens to my information if my account is deleted?

Deleting an account doesn't delete its Resident Credentials or submissions automatically, because they may be part of the barangay's official records. To have them deleted, contact the barangay using the details on the Privacy Policy page. A Super Admin can then erase all of the deleted account's data.

Why did my Resident Credentials disappear after I became an admin?

Admin accounts don't have Resident Credentials. When a Super Admin makes a resident an Admin or Super Admin, their Resident Credentials, including the valid ID photos, are deleted.

Can I use the portal on my phone?

Yes. The Barangay Maduya Portal works on phones, tablets and computers. On a phone, tap the menu button at the top right to open the sidebar. Your account, submissions and dark mode setting follow you on every device.

31.2 Document requests

How do I request a barangay clearance? (Paano mag-request ng barangay clearance?)

Click **Document Request** in the sidebar, click the **Barangay Clearance** card, choose your purpose and how to receive it, upload your GCash receipt if the purpose has a fee (required for Online Soft Copy, optional for pickup), choose a claim date and time for pickup, and click **Submit Request**.

How much is a barangay clearance? (Magkano ang barangay clearance?)

Scholarship, Financial Support, Hospital Support and PAO (Public Attorney's Office) clearances are free. Clearance for Local Employment, Bank / Loan Requirements and Business Clearance have fees set by the barangay. The current fee is shown beside each purpose on the Barangay Clearance form, and the AI Assistant can tell you the current amounts.

How do I pay for my document or court reservation?

Pay with GCash. Send the amount to the barangay's GCash number shown on the form (account name: Barangay Maduya), take a screenshot of the receipt, and upload it on the form. For a paid Barangay Clearance picked up at the Barangay Hall, you can also pay when you claim the document.

When can I claim my document at the Barangay Hall? (Kailan pwedeng i-claim?)

Claiming is Tuesday to Friday, 9:00 AM to 5:00 PM. Wait until your request's status is **Ready for Pickup**, then go to the Barangay Hall. You choose your preferred claim date and time when you submit a pickup request.

How long does a document request take?

The portal doesn't show a fixed processing time. Follow your request's status in **My Requests**; you'll get a notification when it changes, including when it's Ready for Pickup.

Where is my Online Soft Copy?

When your request's status is **Ready for Pickup**, open its Submission Info from **My Requests**. The soft copy is in the Ready for Pickup box under Attachments. Opening it marks the request as Claimed.

Why did my request change to Claimed by itself?

For an Online Soft Copy, the request is marked Claimed automatically when you open its Submission Info while it's Ready for Pickup, because that's how you receive the document.

Can I cancel or edit my document request?

You can delete it while it's still **Pending**: open its actions menu and choose **Delete request**. Requests can't be edited; to change one, delete it and submit a new request. Once it's Processing or later, contact the barangay.

My document request was rejected. What now?

Open its Submission Info to read the reason in the Rejected box and any attachments. Fix the problem, such as uploading a clearer receipt or updating your valid ID in My Profile, and submit a new request.

31.3 Complaints

Is filing a complaint the same as a blotter?

No. The Complaint page is only for non-emergency complaints, and it is not a blotter. Filing a complaint in the portal doesn't create a blotter entry. To file a blotter, you must go to the barangay in person. For emergencies, call the barangay hotline shown on the public website.

How do I file a blotter? (Paano mag-file ng blotter?)

You can't file a blotter in the Barangay Maduya Portal or through the AI Assistant. To file a blotter, you must go to the barangay in person. The portal's Complaint page is only for non-emergency complaints.

Why can't I choose my complaint's category or priority?

The portal's artificial intelligence assigns the category and priority automatically from your subject and description, so every complaint is triaged the same way. They can't be changed after filing.

Why did my complaint get a lower priority than I expected? (Bakit Medium lang ang complaint ko?)

Priority depends on what the complaint describes, not on how strongly it's worded. A problem that hasn't caused harm yet, such as potholes, a clogged drain or uncollected garbage, is Medium, even when written in capital letters or marked as urgent. It becomes High when the complaint describes harm that already happened, such as an accident or injury, or an essential service cut off for many households for a long time. See How complaint priority is decided for every level. The barangay reviews every complaint, whatever its priority.

What happens when I click "This is the same issue"?

Your own report isn't submitted. The existing complaint near that location is added to your My Complaints, read-only, and you're notified whenever its status changes. To stop following it, choose **Remove from My Complaints** in its actions menu.

Will other residents know I filed a complaint?

No. Residents who follow your complaint see its details and status but never who filed it. Complaints in the Noise, Domestic and Others categories are never shown to other residents at all.

Why can't I delete my complaint?

You can delete a complaint only while it's **Pending** and no other residents follow it. Once the barangay sets it to In Progress, or another resident follows it, it can't be deleted.

31.4 Court reservation

Is the court available on a certain date? (Bakante ba ang court?)

Click **Availability** on the Court Reservation page and pick the date, or ask the AI Assistant. Only approved reservations block a time.

Why was part of my reservation charged the night rate?

An hour is charged the day rate only if it falls entirely between 6:00 AM and 6:00 PM. Any hour that crosses 6:00 PM or 6:00 AM, even by one minute, is charged the night rate. For example, 5:30 to 6:30 PM is a night-rate hour.

Can I reserve the court for 1.5 hours, or past midnight?

No. Reservations are in whole hours and must end by 12:00 AM (midnight). To continue after midnight, make a second reservation on the next date starting at 12:00 AM.

The time was available, but my reservation was rejected or couldn't be approved. Why?

Pending reservations don't block a time, so another resident may have requested the same time. If their reservation was approved first, yours overlaps it and can't be approved. Open Submission Info for the barangay's reason, then reserve another time.

What happens to my payment if my reservation is rejected?

The portal doesn't process refunds. Contact the barangay about your payment using the hotlines or email shown on the public website.

31.5 Community Hub

Why don't other residents see my business?

Only **Verified** businesses appear in the Community Hub for other users. Your business shows a status badge until the barangay verifies it. You'll get a notification when its status changes.

My business permit won't upload. Why?

The Business Permit field accepts document files only (PDF, Word, Excel, PowerPoint or text), not images. Save a photo or scan of your permit as a PDF, then upload the PDF.

How do I get my business on the map?

Add a **Location** to your business. Open its actions menu, choose **Edit**, pick the location on the map, and save. Businesses without a location appear only in the Grid tab.

Why is my business Pending again after I edited it?

Editing a business resubmits it, so the barangay can check your changes. Its status goes back to Pending, even if it was Verified or Rejected. A verified business stays hidden from other users until the barangay verifies it again. You'll get a notification when its status changes.

How do I resubmit my rejected business?

Open its Submission Info to read the reason it was rejected. Then open its actions menu, choose **Edit**, fix the problem, and save. The business goes back to Pending for the barangay to review. You don't need to submit it again with **Add Business**.

31.6 News, transparency and notifications

Can I comment on news without an account?

No. Anyone can read news posts and comments, but you must sign in to comment, reply, like or dislike.

Can I delete my comment?

Yes, you can delete your own comments. Deleting a comment also deletes its replies. You can't delete other users' comments.

Will I get notifications by email or text?

No. Notifications appear only on the portal's Notifications page, with an unread count beside Notifications in the sidebar.

I got a notification that my submission was deleted. Why?

A barangay admin deleted it. Its earlier notifications stay on your Notifications page, but the submission can no longer be opened. Contact the barangay using the hotlines or email shown on the public website if you need to know why, or submit it again.

Why did some of my older notifications disappear?

Read notifications are deleted automatically 30 days after you read them. Unread notifications stay until you read them.

31.7 Admins and the Audit Logs

Who can see the Audit Logs? (Sino ang makakakita ng audit logs?)

Super Admins can see every admin's changes on the Audit Logs page in the sidebar. Admins can see only their own changes, in the Audit Logs tab of their profile. Residents can't see the Audit Logs.

How do I find out who changed a submission's status or deleted it?

Super Admins can open the submission's actions menu and choose **Audit Logs**, or search the Audit Logs page for its reference number, such as DR-12. A deleted record's entries stay in the Audit Logs. You can also ask the AI Assistant, for example "Sino ang nag-reject ng DR-12?"

How do I see the changes I made as an admin?

Open **My Profile** from the account menu and choose the **Audit Logs** tab, or ask the AI Assistant, for example "Ano ang mga binago ko ngayong linggo?"

Can audit log entries be edited or deleted?

No. Audit log entries can't be edited or deleted in the portal, and they stay even after an admin's account is deleted.

31.8 AI Assistant

Can the AI Assistant submit a request for me?

No. The AI Assistant shows a button that opens the right form, with details from your message filled in. You check the form, add any uploads, and submit it yourself.

Why does the AI Assistant refuse some questions?

The assistant only helps with Barangay Maduya and the portal. It declines unrelated requests such as homework, coding or general trivia.

The microphone button doesn't work.

Allow microphone access for the website in your browser's settings. Voice messages are limited to 60 seconds. If nothing was heard, the portal says "No speech was detected. Try again."

31.9 Maps, directions and uploads

Directions or Use Current Location doesn't work.

Allow location access for the website in your browser's settings. If the portal says "Unable to retrieve your location.", check that location services are turned on for your device.

My file won't upload.

Check the file's size and type: images up to 15 MB, videos up to 100 MB, documents up to 15 MB (PDF, Word, Excel, PowerPoint or text). Also check the field's maximum number of files; remove a file with its X button to make room.

REFERENCE · CHAPTER 32

32. Glossary

- **Admin:** a barangay staff account that reviews residents' submissions and manages the portal's content and settings.
- **AI Insight:** an AI-generated assessment of a complaint for admins: budget estimate, manpower, timeframe, public safety risk, suggested solution, required resources and prevention advice.
- **Audit Logs:** the portal's record of the changes admins make: who did what, when, and each field's value before and after. Super Admins see every admin's changes; Admins see only their own.
- **Barangay:** the smallest administrative division in the Philippines, headed by the Punong Barangay.
- **Barangay Clearance:** a certification from the barangay, commonly required for employment, business, loan or legal transactions.
- **Barangay Hall:** the barangay's office, where residents claim documents requested for pickup.
- **Blotter:** the barangay's official record of reported incidents. A blotter must be filed in person at the barangay; it can't be filed in the portal. The portal's Complaint page is only for non-emergency complaints and is not a blotter.
- **Certificate of Indigency:** proof of low-income status, used for financial, medical, burial or educational assistance.
- **Certificate of No Objection:** a statement that the barangay has no objection to a specific activity, such as construction, an event or a business permit application.
- **Certificate of Residency:** confirmation that a person currently lives in the barangay.
- **Community Hub:** the portal's directory of verified local businesses.
- **GCash:** the mobile wallet used to pay for paid Barangay Clearances and court reservations.
- **Handler:** the admin who last changed a submission's status and is handling it.
- **Kagawad:** a member of the Sangguniang Barangay (barangay council).
- **Knowledge Base:** the PDF reference documents admins upload in Barangay Settings for the AI Assistant to answer questions from.
- **Online Soft Copy:** a digital copy of a requested document, received through the request's Submission Info.
- **PAO (Public Attorney's Office):** the government office that provides free legal assistance; a free Barangay Clearance purpose.
- **Pinned post:** a news post kept at the top of News & Announcements.
- **Priority:** how urgently the barangay should respond to a complaint: Low, Medium, High or Urgent. It's assigned automatically from the danger the complaint describes and how many residents are affected, not from how it's worded.
- **Punong Barangay:** the head of the barangay, also called the barangay captain.
- **Purok:** a zone or subdivision within a barangay.

- **Reference number:** the code that identifies a submission: DR, CP, CR or CH followed by a number.
- **Resident:** the default account role, for residents using the barangay's services.
- **Resident Credentials:** a resident's profile of personal details and valid ID, required before using most services.
- **Sangguniang Kabataan (SK):** the barangay's youth council.
- **Solo Parent Certification:** certification of solo parent status for benefits under the Solo Parents' Welfare Act.
- **Submission Info:** the window with all details, status and the barangay's reply for one submission.
- **Super Admin:** an admin who can also manage roles, delete accounts and user data, edit or delete any admin's posts, and view every admin's changes in the Audit Logs.
- **Verified:** the status of a Community Hub business the barangay approved, making it visible in the directory.
